Reading Graphic Novels Achim Hescher, 2016-02-22 Distinguishing the graphic novel from other types of comic books has presented problems due to the fuzziness of category boundaries Against the backdrop of prototype theory the author establishes the graphic novel as a genre whose core feature is complexity which again is defined by seven gradable subcategories 1 multilayered plot and narration 2 multireferential use of color 3 complex text image relation 4 meaning enhancing panel design and layout 5 structural performativity 6 references to texts media and 7 self referential and metafictional devices Regarding the subcategory of narration the existence of a narrator as known from classical narratology can no longer be assumed In addition conventional focalization cannot account for two crucial parameters of the comics image what is shown point of view including mise en sc ne and what is seen character perception On the basis of Fran ois Jost s concepts of ocularization and focalization this book presents an analytical framework for graphic novels beyond conventional narratology and finally discusses aspects of subjectivity a focal paradigm in the latest research It is intended for advanced students of literature scholars and comics experts
