Stop Getting Ripped Off Bob Sullivan, 2009-12-29 New York Times bestselling author of Gotcha Capitalism and MSNBC com Red Tape Chronicles columnist Bob Sullivan strikes again to help you evade the financial traps big businesses set for unwary consumers and shows you how to get the best possible deals every single time Today s marketplace is full of hidden fees fine print and other booby traps designed to trip you up and take your money You may be losing big even when you think you re getting a steal But with Sullivan s keen guidance and sensible advice you can save money and regain control of your financial life Clearly and concisely Sullivan reveals why American consumers make such easy targets for corporate America you ll be stunned for example at how poor our math skills are how Wall Street will skim off one third of your retirement money avoid this trap with Sullivan s new Pitfall Proof Pyramid the myths behind credit card reward programs and the 21st Century Bank Account the real numbers to focus on when buying a new car why you should spend more time shopping for your mortgage than your

home the key questions you must ask before buying life insurance the secrets to saving for college and paying off student loans the right way the best deals on cell phones and pay TV service With Sullivan s empowering message financial savvy and knowledge of consumers wants and needs you can outsmart the system keep your hard earned cash and finally stop getting ripped off And you ll become part of a growing grass roots movement to rein in the abuses of corporate America before consumers get hurt by another boom and bust cycle From the Trade Paperback edition *Army-Navy-Air Force Register and Defense Times* ,1909 **A Mind For Numbers** Barbara Oakley, PhD,2014-07-31 The companion book to COURSERA s wildly popular massive open online course Learning How to Learn Whether you are a student struggling to fulfill a math or science requirement or you are embarking on a career change that requires a new skill set A Mind for Numbers offers the tools you need to get a better grasp of that intimidating material Engineering professor Barbara Oakley knows firsthand how it feels to struggle with math She flunked her way through high school math and science courses before enlisting in the army immediately after graduation When she saw how her lack of mathematical and technical savvy severely limited her options both to rise in the military and to explore other careers she returned to school with a newfound determination to re tool her brain to master the very subjects that had given her so much trouble throughout her entire life In A Mind for Numbers Dr Oakley lets us in on the secrets to learning effectively secrets that even dedicated and successful students wish they d known earlier Contrary to popular belief math requires creative as well as analytical thinking Most people think that there s only one way to do a problem when in actuality there are often a number of different solutions you just need the creativity to see them For example there are more than three hundred different known proofs of the Pythagorean Theorem In short studying a problem in a laser focused way until you reach a solution is not an effective way to learn Rather it involves taking the time to step away from a problem and allow the more relaxed and creative part of the brain to take over The learning strategies in this book apply not only to math and science but to any subject in which we struggle We all have what it takes to excel in areas that don t seem to come naturally to us at first and learning them does not have to be as painful as we might think
