*Aquaculture Pond Fertilization*

Charles C. Mischke, 2012-07-10 Ponds are a primary production system to a wide variety of freshwater fish species. Each species has specific and unique nutrient needs, and successful pond fertilization is critical to a successful aquaculture enterprise. *Aquaculture Pond Fertilization: Impacts of Nutrient Input on Production* provides state-of-the-art information for successful fertilization strategies for a broad range of pond-raised species. *Aquaculture Pond Fertilization* attempts to rectify the seemingly contradictory nutrient recommendations by clearly defining the goals of specific types of aquaculture. Chapters are divided into three sections. The first reviews basic concepts in fertilization applicable to all pond-based production. The second looks at specific nutrient management approaches. The third and final section of chapters looks specifically at key freshwater pond species ranging from tilapia to perch and discusses specific fertilization needs for the successful rearing of these in-demand fish. Looking across species with chapters contributed by leaders in the field, *Aquaculture Pond Fertilization* provides succinct single-volume coverage of an oft-neglected but vitally important topic in aquaculture production. *NEET 2019 Biology Guide - 6th Edition* Disha Experts, The thoroughly revised updated 5th Edition of NEET 2018 Biology Must for AIIMS JIPMER is developed on the objective pattern following the chapter plan as per the NCERT books of class 11 and 12.
