

Healthcare and Education Graded Unit

6 pages | 1458 words

As a HNC Health Care student I am required to provide evidence of the following principal aims and objectives: to integrate knowledge, theory and practice, to develop and apply a broad knowledge and skills and to have an individual patient/client focus in my practice. To achieve all of the above I am required to complete project in a form of Graded Unit which consists of three stages: planning, development and evaluation.

After consultation with my work experience mentor and lead lecture (appendix 1 and 2) it was agreed, the project will be a nursing activity, weighing a patient, which will be carried out within an ambulatory care settings which is my current placement. This will take place on Monday the 22nd of April. The chosen activity is a part of the patients' treatment care plan and its aims maintaining patient's safety related to correct medicine administration as well as to detect potential side effects associated with pharmacological treatment. In accordance with applicable law (Data Protection Act 1998) and to maintain patient confidentiality and privacy the name of the patient has been changed. I will be referring to the patient as Cinderella. The patients' personal information had been obtained with her consent and knowledge (NMC Code of Conduct 2008).

Cinderella is a 26 years old patient attending the Peter Burnt Centre at Aberdeen Royal Infirmary where she has been receiving Hepatitis C (HCV) treatment since November 2012. Cinderella lives alone in high rise block of flats in one of Aberdeen City Council estate. She left school at the age of sixteen with no qualifications and used drugs for several years. She was brought up by single parent - her mother, and has no siblings. With the help from local drug rehabilitation team she managed to stop using drugs for five years. Currently she works as a housekeeper on a part time bases in one of the hotels in the city centre. Recently, she has reduced the number of working hours due to the side effects of medication which make her feel very tired. She also complains of an upset stomach and lack of appetite. After having a chat with Cinderella she has told me that her social life and circle of friends is quite limited as her income is now much lower. She also mentioned that is quiet difficult to make new friends while you have drug use history.

When speaking to Cinderella it became evident to me that being HCV positive makes her feels worse than others and reminds her of when she was using drugs. It is well evidenced that people who have both; history of drug use and disease which can be sexually transmitted such is HCV, are likely to experience stigma and discrimination in their life (Gilman 1999). Stigma and discrimination are socioeconomic factors which have a damaging health, social and financial consequences (Nursing Standard 2008). It is believed that those who are stigmatised and discriminated are more likely to have a lower income and due to this cannot afford to purchase better quality food, better housing, live in...
