Summary:

In Laurie Ouelette and Susan Murray's piece "Reality TV: Remaking Television Culture," the elements of this new medium of entertainment are explored. Much of the exploration seems to analyze and reiterate how much this type of entertainment is new and yet it has been around since 1950. The writers examine the structure of reality programming and how it has adapted to contemporary viewing habits. The commercial implications are also examined in that these shows make a large amount of profit for a small investment. The sum of the total parts leads the reader to question not the role of television reality, but really why does it draw in so many viewers.

The concept of reality television can be seen in early television programming in the quiz shows of the 1950's. The core elements involved in reality television were: the hiring of non-actors, or "contestants", who are not in any way scripted, there is also an "unpredictable outcome" (Silverman, Rader 160), and this is what viewers tuned in for. In the case of the quiz shows there were prizes as there are in many of the current shows, but this is not a core element for reality television. The continued history of reality television's conception and growth can be seen in programs like *Star Search* which established the talent search genre of reality television. The same core elements of unscripted non-actors who performed in a capacity to win a prize with outcomes being unpredictable can be seen shows like in *Star Search*. One only needs to point to contemporary television programming to see the correlation, or perhaps the template set by *Star Search*, shows like *American Idol*, *The Voice* and *The X Factor* contain all the same core elements. Other television shows
