 United States. Congress. House. Committee on Post Office and Civil Service. Subcommittee on Postal Operations and
 Services,1978 **Workers, Managers, and Technological Change** Daniel B. Cornfield,2013-11-11 Workers Managers
 and Technological Change Emerging Patterns of Labor Relations contributes significantly to an important subject
 Technological change is one of the most powerful forces transforming the American industrial relations In fact the synergistic
 relationships between technology and indus system trial relations are so complex that they are not well or completely
 understood We know that the impact of technology while not independent of social forces already has been profound it has
 transformed occupations creating new skills and destroying others altered the power relationships between workers and
 managers and changed the way workers learn and work Tech nology also has made it possible to decentralize some economic
 activities out of large metropolitan areas and into small towns rural areas and other coun tries Most important information
 technology makes it possible for interna tional corporations to operate on a global basis Indeed some international
 corporations especially those based in the United States are losing their national identities detaching the welfare of
 corporations from that of particu lar workers and communities Internationalization facilitated by information technology has
 trans formed industrial relations systems A major objective of the traditional American industrial relations system was to take
 labor out of competition *Пространство научных интересов:иностраные языки и межкультурная коммуникация*
