Effective Practices for Children with Autism James K. Luiselli, Dennis C. Russo, Walter P. Christian, Susan M. Wilczynski, 2008-03-13 Children who have autism require comprehensive educational and treatment services. There are a myriad of approaches currently recommended to practitioners and parents but little is known about their efficacy. Which are the most effective in teaching skills, overcoming behavior challenges, and improving quality of life? Methods must be based in research settings but be easily extended to real world settings where children with autism live, go to school, socialize, and recreate. Identifying and validating effective practices is a complex and multi-faceted process but an essential one for responsible research and practice. This book brings together multiple and contemporary perspectives on intervention effectiveness for autism education and behavior support. With contributors from a variety of disciplines and orientations, *Effective Practices for Children with Autism* presents a critical appraisal of current practice standards, emphasizing empirically supported procedures and research to practice applications. By bringing together a diverse group of authors, the editors have ensured that the vast field of information on interventions for children with autism is thoroughly examined and that no topic has gone untouched. Written for practitioners, researchers, scientists, and clinicians, the book is an essential framework for evaluating educational and treatment procedures, selecting those that are most effective, and evaluating outcomes.

Central to the book is a best practice template for providing behavioral stepped care in medical settings, including screening and assessment levels of intervention and treatment referrals and collaboration with primary care and other specialties. Using this format, contributors detail specific challenges of and science-based interventions for a diverse range of common conditions and issues, including Depression, Anxiety disorders, Adherence to chronic obstructive pulmonary disorder management, Alcohol, and other substance misuse, Attention deficit hyperactivity disorder, Chronic pain, Neurocognitive disorders, Paraphilias, problematic sexual interests, WU3 Sexual abuse, and PTSD in children.
