Teamwork Carl E. Larson, Frank M. J. LaFasto, 1989-08-01

What are the secrets of successful teams? Why do some teams achieve remarkable success while others fail or are consigned to mediocrity? To find the answers, Carl E. Larson and Frank M. J. LaFasto conducted a three-year study of teams and team achievement. Interviewing a wide range of teams, including the space shuttle Challenger investigation team, executive management teams, and a championship football team, Larson and LaFasto discovered a surprising consistency in the characteristics of effective teams. In *Teamwork*, they explore the eight properties of successful teams: a clear, elevating goal; a results-driven structure; competent team members; unified commitment; collaborative climate; standards of excellence; external support and recognition; and principled leadership. A final chapter examines the priority of the steps that lead to the building of a high-performance team. The authors strive to make the concepts concrete, coupling solid theory with straightforward practical advice on how to apply it, and with lively, fascinating anecdotes. The volume will appeal to practitioners, scholars, and advanced students in the areas of organization studies and management, as well as interpersonal communication. We believe it is an important book that will be very useful to the sport psychology community. Its brief and readable nature makes it an ideal supplementary text for courses in the social psychology of sport or sport-related group dynamics. It could also be used in research methods courses to provide insight into qualitative data collection procedures. In addition, coaches and mental skills consultants will find much valuable information here about the evaluation and enhancement of team functioning. Finally, researchers will be intrigued by Larson and LaFasto's eight-category framework and their brief description of a rating scale.
