Leading for Equity Stacey M. Childress, Denis P. Doyle, David A. Thomas, 2009-07-01 Leading for Equity tells the compelling story of the Montgomery County Maryland Public Schools and its transformation in less than a decade into a system committed to breaking the links between race and class and academic achievement In chapters organized around six core themes the authors lay out the essential elements of MCPS s success They identify key lessons other districts can draw from MCPS s experience and offer a framework for applying them A dramatic departure from business as usual MCPS has won nationwide attention as a compelling model for tackling the achievement and opportunity issues that confront our nation as a whole Managing School Districts for High Performance Stacey Childress, 2007 Managing School Districts for High Performance brings together more than twenty case studies and other readings that offer a powerful and transformative approach to advancing and sustaining the work of school improvement At the center of this work is the concept of organizational coherence aligning organizational design human capital management resource allocation and accountability and performance improvement systems to support an overarching strategy This central idea provides a valuable conceptual framework for current and future school leaders The case studies presented in Managing School Districts for High Performance grow out of the Public Education Leadership Project PELP a unique partnership between the Harvard Business School the Harvard Graduate School of Education and a network of urban school districts This rich array of cases explores the managerial challenges districts face as they seek to ensure rich learning opportunities and high achievement for all students across a system of schools This book of insightful case studies fills a void long felt by educational administrators in search of practical real world training tools It will serve as a catalyst for the tough conversations district leaders need to have about achieving high quality outcomes for all students The Broad Center for the Management of School Systems has used many of these cases with great success and we are excited that they are now compiled into a single collection Dan Katzir Managing Director The Broad Foundation This volume is not a treatise about how schools and districts should work Rather it provides a deep immersion in the real dilemmas involved in advancing school district reform Anyone who works through these cases cannot help but come away with a more informed vision for change a more reflective orientation about the interrelationships among the multiple tasks involved and a more prudent grasp of what it takes to educate all children to high academic standards The course of study presented by Managing School Districts for High Performance should be required professional education for anyone charged with advancing a coherent agenda of school improvement in our diverse demanding and rapidly changing society Anthony S Bryk Spencer Professor of Organizational Studies Stanford University This set of case studies offers practitioners policymakers and scholars the opportunity to learn from the collective wisdom and real life experiences of educational leaders involved in systemic transformation Implementing coherent reform strategies designed to improve and sustain student performance often takes place in a vacuum As a former urban superintendent I

believe that these selected educational case studies provide a compelling forum for shared experiential teaching and learning

Arlene Ackerman Christian A Johnson Professor of Outstanding Educational Practice Teachers College Columbia University

This collaboration between the Harvard Business School and the Harvard Graduate School of Education provides a set of analytical tools to address the most complex and challenging issues facing urban public schools The contemporary case studies document actual choices and constraints and point to patterns and similarities across organizations from urban schools to corporate environments Carol Johnson Superintendent Boston Public Schools Stacy Childress is a lecturer at Harvard Business School Richard F Elmore is the Gregory R Anrig Professor of Educational Leadership at the Harvard Graduate School of Education Allen S Grossman is the MBA Class of 1957 Professor of Management Practice at Harvard Business School Susan Moore Johnson is the Pforzheimer Professor of Teaching and Learning at the Harvard Graduate School of Education

Improving Education in the US Rafael Yanushevsky, 2011 US education is in crisis This history and analysis of the education system is an essential primer for parents teachers and school administrators as well as parent teacher organizations education majors education administration majors the media politicians and everyone who wants to see American schools do a better job The author considers the genesis of public schools in the United States various aspects of public education systems from elementary school through university trends in education and reform and issues that still need to be addressed The book contains information about public and private organizations think tanks institutions and governmental bodies involved in public education reform The book shows the deficiency of the existing education system and compares it to more efficient systems The author shows that most of the existing approaches to improve education are based on the same foolish idea that as long as government spending on education is great enough the improvement will follow The bond between education and politics hinders progress in education The problems facing schools as well as the recommended solutions are considered The author cites multiple research attempts to improve the functioning of the existing education system that have still failed to bring any tangible results He uses his specialized knowledge to explain what should be done for educational progress to become reality

Introductory Statistics William B. Ware, John M. Ferron, Barbara M. Miller, 2013-02-15 This comprehensive and uniquely organized text is aimed at undergraduate and graduate level statistics courses in education psychology and other social sciences A conceptual approach built around common issues and problems rather than statistical techniques allows students to understand the conceptual nature of statistical procedures and to focus more on cases and examples of analysis

Wherever possible presentations contain explanations of the underlying reasons behind a technique. Importantly this is one of the first statistics texts in the social sciences using R as the principal statistical package. Key features include the following:

- Conceptual Focus** The focus throughout is more on conceptual understanding and attainment of statistical literacy and thinking than on learning a set of tools and procedures.
- Problems and Cases** Chapters and sections open with examples of situations related to the forthcoming issues and major sections end with a case study. For example, after the section on describing relationships between variables, there is a worked case that demonstrates the analyses, presents computer output, and leads the student through an interpretation of that output.
- Continuity of Examples** A master data set containing nearly all of the data used in the book's examples is introduced at the beginning of the text. This ensures continuity in the examples used across the text.
- Companion Website** A companion website contains instructions on how to use R, SAS, and SPSS to solve the end-of-chapter exercises and offers additional exercises.
- Field Tested** The manuscript has been field tested for three years at two leading institutions.

Fear of Math Claudia Zaslavsky, 1994. The author offers a host of methods drawn from many cultures for tackling real-world math problems and explodes the myth that women and minorities are not good at math.

Included are reflections on the challenges of designing studies for improving the instructional core of schools, guidelines for establishing evidence of interventions' impacts across a wide range of settings, and an assessment of national efforts to bring reform to scale in high-poverty schools. This volume also includes findings and insights from several federally funded research projects charged with bringing conceptual and analytic rigor to studies of successful scale-up. All of the chapters address the challenges of conducting scientific research in schools and

provide insights for obtaining the support of teachers and school administrators The result is a highly readable volume ideally suited for educators interested in the issues that inform intervention research researchers concerned with designing practical studies that are methodologically sound and policymakers engaged in evidence based school reform
