Chemistry of Aerosols Kvetoslav R. Spurny, 1999-04-23 Until the 1980s researchers studied and measured only the physical properties of aerosols. Since the 80s however interest in the physicochemical properties of aerosols has grown tremendously. Scientists in environmental hygiene, medicine and toxicology have recognized the importance held by the chemical composition and properties of aerosols and the interactions of inhaled bad aerosols. This book offers the first comprehensive treatment of modern aerosol analytical methods, sampling and separation procedures and environmental applications and offers critical reviews of the latest literature. This important field has developed rapidly in the last 15 years but until now no book effectively summarized or analyzed the existing research. Analytical Chemistry of Aerosols reviews procedures, techniques and trends in the measurement and analysis of atmospheric aerosols. With contributions from acknowledged international experts, the book discusses various methods of bulk analysis, single particle analysis and the analysis of special aerosol systems including fibrous and bacterial aerosols.

The Hidden Curriculum - Faculty Made Tests in Science Sheila Tobias, 1997 Teaching Science Online Dietmar Kennepohl, 2023-07-03 With the increasing focus on science education, growing attention is being paid to how science is taught. Educators in science and science related disciplines are recognizing that distance delivery opens up new opportunities for delivering information, providing interactivity, collaborative opportunities and feedback as well as for increasing access for students. This book presents the guidance of expert science educators from the US and from around the globe. They describe key concepts, delivery modes and emerging technologies and offer models of practice. The book places particular emphasis on experimentation, lab and field work as they are fundamentally part of the education in most scientific disciplines. Chapters include Discipline methodology and teaching strategies in the specific areas of physics, biology, chemistry and earth sciences. An overview of the important and appropriate learning technologies, ICTs for each major science. Best practices for establishing and maintaining a successful course online. Insights and tips for handling practical components like laboratories and field work. Coverage of breaking topics including MOOCs, learning analytics, open educational resources and m learning. Strategies for engaging your students online.
