The second edition has been updated to include: Expanded discussion of compounding, discounting and capital budgeting as well as an expanded discussion of when to replace a capital asset that has i) costs but no direct revenue stream such as a machine ii) costs and a direct annual revenue stream such as a solar array or iii) costs and a periodic revenue stream illustrated by the forest rotation problem. New practical examples to provide students with applications of the concepts being discussed in the text, most notably on New Zealand and a Radiata Pine (*Pinus radiata*) Plantation.
