*Environmental Science* Travis P. Wagner, Robert M. Sanford, 2018-07-03 Historically viewed as a sub discipline of biology or ecology environmental science has quickly grown into its own interdisciplinary field grounded in natural sciences with branches in technology and the social science today s environmental science seeks to understand the human impacts on the Earth and develop solutions that incorporate economic ethical planning and policy thinking This lab manual incorporates the field s broad variety of perspectives and disciplines to provide a comprehensive introduction to the everyday practice of environmental science Hands on laboratory activities incorporate practical techniques analysis and written communication in order to mimic the real world workflow of an environmental scientist This updated edition includes a renewed focus on problem solving and offers more balanced coverage of the field s diverse topics of interest including air pollution urban ecology solid waste energy consumption soil identification water quality assessment and more with a clear emphasis on the scientific method While labs focus on the individual readers are encouraged to extrapolate to assess effects on their campus community state country and the world

*Not Just Science* Zondervan, 2009-08-30 This book argues that it is possible for our study of the natural world to enhance our understanding of God and for our faith to inform and influence our study and application of science Whether you are a student someone employed in the sciences or simply an interested layperson *Not Just Science* will help you develop the crucial skills of critical thinking and reflection about key questions in Christian faith and natural science The contributors provide a systematic approach to both raising and answering the key questions that emerge at the intersection of faith and various disciplines in the natural sciences Among the questions addressed are the context limits benefits and practice of science in light of Christian values Questions of ethics as they relate to various applied sciences are also discussed The end goal is an informed biblical worldview on both nature and our role in obeying God s mandate to care for his creation With an honest approach to critical questions *Not Just Science* fills a gap in the discussion about the relationship between faith and reason This is a most welcomed addition to these significant scholarly conversations Ron Mahurin PhD Vice President Professional Development and Research Council for Christian Colleges Universities

**The Moon in the Nautilus Shell** Daniel B. Botkin, 2012-09-14 Why do we keep talking about so many environmental problems and rarely solve any If these are scientific issues then why can't scientists solve them or at least agree on what to do In his new book The Moon in the Nautilus Shell ecologist Daniel Botkin explains why For one thing although we live in a world of constantly changing environments and talk a lot about climate change most of our environmental laws policies and scientific premises are based on the idea that the environment is constant never changing except when people affect it For another we have lost contact with nature in

personal ways Disconnected from our surroundings we lack the deep understanding and feelings about the environment to make meaningful judgments The environment has become just another one of those special interests that interferes with our lives Poised to be a core text of the twenty first century environmental movement The Moon in the Nautilus Shell challenges us to think critically about our role in nature      **Environmental Sustainability and Conservation in Nigeria** ,2005
