*A User's Guide to the Meade LXD55 and LXD75 Telescopes* Martin Peston, 2010-04-28 I have owned telescopes for over 25 years since I was a young lad I purchased an LXD55 AR 6 Refractor in 2002 and was one of the first to own one in the UK I am also a proud owner of an LXD75 SC 8 Armed with these two very different telescopes I have spent many hours searching the skies for interesting objects using Meade's Autostar Goto facility My motivation to write a book about the LXD Goto telescope series first came from comments about an LXD55 AR 6 Refractor review that was published on the LXD55.com website From then on I have had regular emails from people asking technical questions about the telescope and which model is best suited for them Whilst attending Star parties in the UK I found that many LXD owners would struggle to use them even at a basic level especially if they have never owned or used an equatorially mounted Goto telescope before Since the first LXD55 models came out in early 2002 owners have struggled to find useful information to help them use the telescopes to the best advantage There have been mixed reactions about its quality and performance Hence this book is directed towards those who are new to Goto and the LXD telescope

Tomlinson,2018-12-22 There s something odd about twin lens reflex TLR film cameras but very appealing I can t really explain it TLR cameras are bulky awkward to use and well kind of weird Still I love picking one up and taking it out to shoot Mamiya TLRs comprise a rare line of TLR cameras in that they were the only pro TLR cameras that had interchangeable lenses other than Contaflex That fact alone made me long for one a long time When I bought my Yashica Mat EM there were Mamiya TLR cameras available but usually at two to three times the cost Like the other medium format MF cameras Hasselblad Bronica Pentax etc the Mamiyas were far out of reach That is until around 2003 when photographers were ditching their film cameras and selling them cheap They may not be as cheap now but they re still worth the prices As I said shooting with a TLR is an odd experience but one definitely worth experiencing *Computer Methods and Programs in Biomedical Signal and Image Processing* Lulu Wang,2020-03-18 This book aims to provide a brief update to the current status of and advances in computational methods and programs used for the development of the theory and practice of biomedical signal and image communication The book comprises a collection of invited manuscripts written in a convenient way and of manageable length These timely collections will provide an invaluable resource for initial inquiries into
