Transforming the War on Drugs Annette Idler, Juan Carlos Garzón Vergara, 2021-12-01 The war on drugs has failed but consensus in the international drug policy debate on the way forward is missing Amidst this moment of uncertainty militarized lenses on the global illicit drug problem continue to neglect the complexity of the causes and consequences that this war is intended to defend or defeat Challenging conventional thinking in defense and security sectors Transforming the War on Drugs constitutes the first comprehensive and systematic effort to theoretically conceptually and empirically investigate the impacts of the war on drugs The contributors trace the consequences of the war on drugs across vulnerable regions including South America and Central America West Africa the Middle East and the Golden Crescent the Golden Triangle and Russia It demonstrates that these consequences are global The war's local impacts on human rights security development and public health are interdependent with transnational illicit flows The book further reveals how these impacts have influenced the positions of governments across these regions with significant ramifications for the international drug control regime Crucially it shows that at a time when global order is in flux critically evaluating the regime's securitization through the war on drugs provides key insights into other global governance realms

The War on Drugs Ron Chepesiuk, 1999-12-17 Here is the whole story of the world of drugs from the infamous Opium Wars to the legal availability of narcotics in the United States during the past century from the unexpected boost given to illicit drugs by Prohibition to the great success of the French Connection The global drug trade is one of the

most prominent examples of the law of supply and demand. Despite such countermeasures as the execution of narcotics dealers in China and the United States's much ballyhooed War on Drugs, drug traffickers have always managed to meet the demand and satisfy an ever-growing customer base. In addition to offering a wealth of little-known facts, *The War on Drugs* also covers major dealers, cartels, organizations, smuggling, and anti-smuggling strategies, major miscalculations and disasters, drug epidemics, legal restraints, famous incidents, and more.

War on Drugs, HIV/AIDS, and Human Rights Kasia Malinowska-Sempruch, Sarah Gallagher, 2004. Annotation: Drug policies are often categorized in terms of public health and safety; governments forbid the voluntary use of certain substances because such use undermines the good of society as a whole. This book aims to position drug policies in another context: the context of human rights. Articles will examine the rights of drug users, with special attention to the right to adequate medical care, which is often denied to intravenous drug users who are suffering from HIV/AIDS. Included will be articles that express a contrary position: that intravenous drug users have voluntarily relinquished their rights by engaging in criminal behavior. Particularly controversial are the rights of drug-using mothers whose children are sometimes put into state custody. The book will also examine the conflict between criminal codes and the human right of individual freedom, emphasizing the human rights abuses that often accompany drug policy enforcement. The texts of basic treaties and accords on human rights will be included.

Anti-Drugs Policies of the European Union M. Elvins, 2003-08-06. Martin Elvins' book is the first to trace the evolution of anti-drugs policies at the European Union level from the late 1960s to the present. Phases of drug policy development, key policy actors, and institutions are described with particular reference to the influence of transnational networks of expertise. Policy development is placed in the context of both European integration and a broad harmonization of international policies against drug trafficking. Concerns are also raised about secretive and anti-democratic features of intergovernmental EU decision-making.

The European Approach to Peacebuilding Dorly Castañeda, 2014-11-18. Examining peacebuilding through the intersection of security, development, and democracy, Castaneda explores how the European Union has employed civilian tools for supporting peacebuilding in conflict-affected countries by working at the same time with CSOs and government institutions.

Novel Psychoactive Substances Ornella Corazza, Andres Roman-Urrestarazu, 2017-08-09. In light of the recent emergence of Novel Psychoactive Substances (NPS) on a global scale, this book provides a timely analysis of the social and economic impact of the NPS phenomenon and of the global policy and regulatory responses to it. It presents the first comprehensive overview of the international regulation, policy, and market structure of the NPS phenomenon, offering a guide to inform legislative discussions and demonstrating from a comparative perspective the different approaches used to address the rise of NPS to date. It covers topics such as organized crime, drug markets, clinical evidence on NPS, and different regulatory approaches also in less-explored settings such as prisons and sport environments. Overall, this highly informative and well-structured repository of different experiences with NPS policy, law, and regulation offers an essential primary source of evidence for

anyone interested in the area of drug and NPS policy health economics and public health

The War on Drugs in Tanzania Dane Degenstein, 2022-03-28 In 2017 late Tanzanian president John Magufuli publicly declared a war on drug users in Tanzania an unprecedented change in policy in a country leading harm reduction initiatives in East Africa In the fall of 2018 Dane Degenstein traveled to Dar es Salaam to learn about these policy changes from those directly impacted The War on Drugs in Tanzania Prohibition and Punishment examines the impact of crackdowns on people who use drugs and the impact of policy changes that curtail progressive and humane approaches to improving services for drug users Degenstein explores how the Tanzanian government sidelined donors and NGOs undertook a project that directly impinged on human rights and produced narratives contributing to a global war on drugs Using the case study of Tanzania Degenstein draws out larger lessons on the continued international commitment to the war on drugs how old ideologies that see drug users as criminals and failures continue to be produced and how the war on drugs erases the perspectives of drug users themselves Focusing on the experiences of drug activists themselves the author argues for a radical rethinking of global drug policy

Transnational Crimes in the Americas Marshall B. Lloyd, 2018-10-30

Transnational Crimes in the Americas addresses contemporary issues with respect to public institutions that are stakeholders in the fight against globalization of crime. Regional public organizations with a primary focus on the Americas constitute a framework for understanding the need for an institutional response within the Western Hemisphere. While other authors have addressed the growth of organized crime, no one has explained institutional developments in the struggle against transnational crimes. *Transnational Crimes in the Americas* highlights existing organizations, emphasizing a regional response to transnational crimes, suggestions for a permanent criminal court in the Americas, and an appraisal of the current state of institutional developments in the region.

Issues in Transnational Policing James Sheptycki, 2002-01-04

Globalisation, the wired planet, the global village: these are a few of the terms associated with the social and political changes that are said to describe the world at the beginning of the new millennium. One of the most important institutions of the social ordering has been that of policing, but very little has been written on how the practices of social control are affected by the processes of transnationalisation. This book brings together contributions by experts on policing that focus on some of the newly emergent policing issues connected with these changes: the global private security industry, cross-national networking between police, the establishment of an international criminal court, money laundering, policing cyberspace, the drug war. *Issues in Transnational Policing* crosses the boundaries between criminology, international relations, and international law to provide a thought-provoking picture of the complex issues surrounding the politics of policing in the future.
