Arif and Rohit are childhood friends. Though they come from different religious background but there is very good understanding between them . After completing MBA both decided to take care of the friendship a step further and become business partners. They decided to start a wire manufacturing business . They know that the factory of wire manufacturing pollutes the environment. They are contemplating on two options . First option is to established the factory in rural area. The poor and illiterate local residents will not be aware of the adverse effects of pollution and thus Arif and Rohit can manufacture wire at low cost of production. Second option is to install an advanced pollution control plant in their factory to control the pollution by avoiding bat smoky chimneys and fulfill their social responsibility . But it will require additional cost of Rs. 1,35,000 and increase the cost of production. After lot of thinking both friends choose the second option and decided to set up their factory in the rural area with advance to pollution control plant.

Archdale, Margaret Haig Thomas Mackworth (Viscountess Rhondda), 1968 **United States Government Publications Monthly Catalog**, 1946 [Marketing of Livestock, Meat, and Meat Products, 1962-June 1967](#) Betty B. Baxtresser, 1968 *Protecting the Global Civilian from Violence* Timo Kivimäki, 2021-05-10 This book reveals why the UN is more successful than unilateral great powers in protecting civilians from violence and focuses on the discourse development and consequences of UN peacekeeping Analysing statistics of state fragility and fatalities of violence it reveals that the UN has managed to save tens of thousands of lives with its peacekeeping a surprising statistic given the media consensus about the UN's powerlessness and inefficiency Using computer assisted discourse analysis of resolutions from the UN Security Council 1993 2019 the book offers data that describe the character and development of UN approach to the protection of civilians from violence It then links the data to the statistics of conflict fatalities and state fragility to reveal by means of qualitative and quantitative analysis when where how and why the UN has been successful at protecting civilians Two reasons for the UN's success are highlighted in the book as being statistically most significant First the organization offers local ownership to peaceful solutions by considering conflicting parties as the primary agents of protection Second the UN approach is much less power oriented than unilateral approaches by the great powers protection for the UN does not mean deterrence or destruction but rather support for local protectors of civilians However strong great power influence on

such operations tends to weaken UN's ability to save lives. This book will be of much interest to students of humanitarian intervention, peacekeeping, human rights and International Relations in general. The AAEEC Symposia Series was started in 1983 by Alain Poli Toulouse who together with R Desq D Lazard and P Camion organized the first conference. Originally the acronym AAEEC meant Applied Algebra and Error Correcting Codes. Over the years its meaning has shifted to Applied Algebra Algebraic Algorithms and Error Correcting Codes reflecting the growing importance of complexity in both decoding algorithms and computational algebra. AAEEC aims to encourage cross fertilization between algebraic methods and their applications in computing and communications. The algebraic orientation is towards finite fields, complexity, polynomials and graphs. The applications orientation is towards both theoretical and practical error correction coding and since AAEEC 13 Hawaii 1999 towards cryptography. AAEEC was the first symposium with papers connecting Gröbner bases with EC codes. The balance between theoretical and practical is intended to shift regularly at AAEEC 14 the focus was on the theoretical side. The main subjects covered were Codes, iterative decoding, decoding methods, block codes, code construction, Codes and algebra, algebraic curves, Gröbner bases and AG codes, Algebra rings and fields, polynomials, Codes and combinatorics, graphs and matrices, designs, arithmetic, Cryptography, Computational algebra, algebraic algorithms, Sequences for communications.
