**The Politics of Utopia** Arnaud Orain,2024-07-11 The Scottish economist John Law has been described as the architect of modern central banking His System established in Regency France between 1716 and 1720 saw the founding of a bank issuing paper money and the establishment of commercial and colonial enterprises aimed at consolidating public debt What at first seemed like financial wizardry however resulted in rampant speculation and economic collapse In this book Arnaud Orain offers a provocative rereading of this well known episode Starting in the seventeenth century he reconstructs the figures and ideas long predating Law that anticipated and laid the groundwork for the System which he argues is best understood as a failed social utopia aimed at the total transformation of society Overturning familiar narratives of this seismic event this book rewrites a stunning chapter in economic history revealing new lessons for today's fraught financial landscape

**Boom, Bust, and Beyond** Stefano Condorelli,Daniel Menning,2019-09-02 Few financial crises historically speaking have attracted such attention as the Mississippi and South Sea Bubbles of 1719-20 The twin bubbles had major economic and political implications sending shock waves through the whole of Europe they astonished contemporaries and to a large extent they still resonate today This volume offers new readings of these events drawing on fresh research and new evidence that challenge traditional interpretations The chapters engage in particular with the geographical frame of the 1719-20 bubbles their social cultural economic and political impact the ways in which contemporaries understood speculation the contributions and impact of a diverse array of participants popular and print memorialization of the events Overall the volume helps to rewrite the history of the 1719-20 bubbles and to recontextualize their place within eighteenth century history
