Afghan National Army Vince Bywaters, The origins of the Afghan National Army ANA are deeply rooted in Afghanistan's long and complex history of warfare tribal loyalties and external interventions While the modern ANA officially emerged in the early 2000s its conceptual and cultural roots stretch back through centuries of conflict and evolving governance structures in the region Historically Afghanistan's military forces were shaped by local warlords and tribal leaders who provided security and fought in various internal and external conflicts The concept of a centralized national army gained traction during the reign of King Amanullah Khan in the early 20th century when efforts were made to modernize and professionalize Afghanistan's armed forces However these early attempts were limited in scope and largely symbolic as loyalty to tribe ethnicity and local power brokers often took precedence over national allegiance The collapse of the Soviet backed Afghan army following the withdrawal of Soviet troops in 1989 and the subsequent civil war left the country without a functioning central military During the 1990s various militia groups and warlord factions operated with near complete autonomy eroding the notion of a unified national army When the Taliban emerged in 1996 they created their own military forces but these were more ideological and less structured as a national institution

Polymer Microscopy ,1992 *Telecommunications Reform in India* Rafiq Dossani, 2002-05-30 Telecommunications reform in India is complete according to policymakers there They have done everything correctly in their efforts to transform a state run monopoly into an independently regulated sector in which private companies compete with government owned and operated providers And yet India lags behind nations whose telecom sectors provided comparable levels of service a decade ago What went wrong Dossani and his contributors argue that the classic textbook solutions are insufficient to produce a healthy telecom industry in India which needs to improve regulatory design introduce competition in a single phase instead of gradually implement innovative funding models and choose appropriate technologies in order to improve access to universal service Containing valuable lessons for the telecommunications industries in Mexico Indonesia the Philippines and other countries taking

formerly state run industries private this book constitutes a valuable resource for policymakers regulators practitioners scholars and overseas investors Policymakers and regulators will learn that cookie cutter solutions derived from rich country experience do not always work in countries that are poor yet democratic and pro market Practitioners will be interested in the sections on universal service technology convergence and the implications for reducing costs and improving the quality of both basic telephone services and IT enabled services In particular Indian technology workers in Silicon Valley should find this book indispensable Investors will gain valuable knowledge about this potentially huge market Scholars preconceived ideas may be nudged aside as their knowledge base is enhanced and their research agenda expanded Whereas some of the book's conclusions support current thinking such as the need to begin a sequence of reform with a regulatory system in place and the need for dominant carrier regulation other conclusions challenge the conventional wisdom Contributors make a cogent case for reformulating the balance of power between regulators and policymakers introducing competition at the local level rather than through large franchises and replacing public subsidies with cross subsidies of universal service Provides a multidisciplinary approach to understanding the problems of telecommunications reform in all their complexity *Cotton International* ,1983
