The Women's Movement and Women's Employment in Nineteenth Century Britain Ellen Jordan,2002-01-04 In the first half of the nineteenth century the main employments open to young women in Britain were in teaching dressmaking textile manufacture and domestic service After 1850 however young women began to enter previously all male areas like medicine pharmacy librarianship the civil service clerical work and hairdressing or areas previously restricted to older women like nursing retail work and primary school teaching This book examines the reasons for this change The author argues that the way femininity was defined in the first half of the century blinded employers in the new industries to the suitability of young female labour This definition of femininity was however contested by certain women who argued that it not only denied women the full use of their talents but placed many of them in situations of economic insecurity This was a particular concern of the Womens Movement in its early decades and their first response was a redefinition of feminity and the promotion of academic education for girls The author demonstrates that as a result of these efforts employers in the areas targeted began to see the advantages of employing young women and young women were persuaded that working outside the home would not endanger their femininity *A History of Women's Work* Janet Few,2025-07-30 Uncovers the vital yet often hidden roles women played in households industries and paid employment throughout history A History of Women s Work explores the often overlooked contributions of women throughout history particularly in a patriarchal society where men have dominated the historical record While men were more likely to leave traces through wills leases and civic duties women laboured behind the scenes performing crucial yet unpaid tasks for their families and communities In many households women supported their husbands work ran home based industries or sought paid employment despite societal

restrictions This book delves into three main areas of women's work: household tasks, home industries, and paid employment outside the home. Through case studies and practical research tips, it sheds light on the lives of these women, encouraging readers to uncover their own female ancestors' stories and contribute to a richer understanding of women's history. Early Professional Women in Northern Europe, c. 1650-1850 Johanna Ilmakunnas, Marjatta Rahikainen, Kirsi Vainio-Korhonen, 2017-07-06 This book focuses on early examples of women who may be said to have anticipated in one way or another modern professional and/or career-oriented women. The contributors to the book discuss women who may at least in some respect be seen as professionally ambitious, unlike the great majority of working women in the past. In order to improve their positions or to find better business opportunities, the women discussed in this book invested in developing their qualifications and professional skills, took economic or other kinds of risks, or moved to other countries. Socially, they range from elite women to women of middle class and lower middle class origin. In terms of theory, the book brings fresh insights into issues that have been long discussed in the field of women's history and are also debated today. However, despite its focus on women, the book is conceptually not so much focused on gender as it is on profession, business, career, qualifications, skills, and work. By applying such concepts to analyzing women's endeavours, the book aims at challenging the conventional ideas about them. Women at Work Thomas Dublin, 1979 Social origins study about the employment of women in the mills 1826-1860 enabled women to enjoy social and independence unknown to their mothers' generation. **Women and Reform in a New England Community, 1815-1860** Carolyn J. Lawes, 2014-07-11 Interpretations of women in the antebellum period have long dwelt upon the notion of public versus private gender spheres. As part of the ongoing reevaluation of the prehistory of the women's movement, Carolyn Lawes challenges this paradigm and the primacy of class motivation. She studies the women of antebellum Worcester, Massachusetts, discovering that whatever their economic background, women there publicly worked to remake and improve their community in their own image. Lawes analyzes the organized social activism of the mostly middle-class urban white women of Worcester and finds that they were at the center of community life and leadership. Drawing on rich local history collections, Lawes weaves together information from city and state documents, court cases, medical records, church collections, newspapers, and diaries and letters to create a portrait of a group of women for whom constant personal and social change was the norm. Throughout *Women and Reform in a New England Community*, conventional women make seemingly unconventional choices. A wealthy Worcester matron helped spark a women-led rebellion against ministerial authority in the town's orthodox Calvinist church. Similarly, a close look at the town's sewing circles reveals that they were vehicles for political exchange as well as social gatherings that included men but intentionally restricted them to a subordinate role. By the middle of the nineteenth century, the women of Worcester had taken up explicitly political and social causes such as an orphan asylum; they founded, funded, and directed it. Lawes argues that economic and personal instability, rather than a desire for social control, motivated women, even relatively privileged ones, into social

activism She concludes that the local activism of the women of Worcester stimulated and was stimulated by their interest in the first two national women s rights conventions held in Worcester in 1850 and 1851 Far from being marginalized from the vital economic social and political issues of their day the women of this antebellum New England community insisted upon being active and ongoing participants in the debates and decisions of their society and nation Gender in English Society 1650-1850 Robert B. Sumner, 1910 *Women of the Mexican Countryside, 1850-1990* Heather Fowler-Salamini, Mary Kay Vaughan, 2022-03-08

Too often in the history of Mexico women have been portrayed as marginal figures rather than legitimate participants in social processes. As the twentieth century draws to a close, Mexican women of the countryside can be seen as true historical actors: mothers and heads of households, factory and field workers, community activists, artisans, and merchants. In this new book, thirteen contributions by historians, anthropologists, and sociologists from Mexico as well as the United States elucidate the roles of women and changing gender relations in Mexico as rural families negotiated the transition from an agrarian to an industrial society. Drawing on Mexican community studies, gender studies, and rural studies, these essays overturn the stereotypes of Mexican peasant women by exploring the complexity of their lives and roles and examining how these have changed over time. The book emphasizes the active roles of women in the periods of civil war, 1854-76, and the commercialization of agriculture, 1880-1910. It highlights their vigorous responses to the violence of revolution, their increased mobility, and their interaction with state reforms in the period from 1910 to 1940. The final essays focus on changing gender relations in the countryside under the impact of rapid urbanization and industrialization since 1940. Because histories of Latin American women have heretofore neglected rural areas, this volume will serve as a touchstone for all who would better understand women's lives in a region of increasing international economic importance. *Women of the Mexican Countryside* demonstrates that, contrary to the peasant stereotype, these women have accepted complex roles to meet constantly changing situations.
