**EBOOK: Macroeconomics** Rudiger Dornbusch, Stanley Fischer, Richard Startz, 2014-02-16 Dornbusch Fischer and Startz has been a long standing leading intermediate macroeconomic theory text since its introduction in 1978 This revision retains most of the text's traditional features including a middle of the road approach and very current research while

updating and simplifying the exposition A balanced approach explains both the potential and limitations of economic policy Macroeconomics employs a model based approach to macroeconomic analysis and demonstrates how various models are connected with the goal of giving students the capacity to analyze current economic issues in the context of an economic frame of reference The only pre requisite continues to be principles of economics     eBook: [Economics 20th Edition](#)

MCCONNELL,2017-02-15 eBook Economics 20th Edition     **EBOOK: Essentials of Economics, 10/e**

SCHILLER,2016-03-22 EBOOK Essentials of Economics 10 e     *Public Finance, Global Edition* Ted Gayer,HARVEY ROSEN,2014-01-16 Rosen and Gayer s Public Finance provides the economic tools necessary to analyze government expenditure and tax policies and along the way takes students to the frontiers of current research and policy While the information presented is cutting edge and reflects the work of economists currently active in the field the approach makes the text accessible to undergraduates whose only prior exposure to economics is at the introductory level The authors years of policy experience have convinced them that modern public finance provides a practical and invaluable framework for thinking about policy issues The goal is simple to emphasize the links between sound economics and the analysis of real world policy problems Enhancements and key features for this new Global Edition include New Policy Perspectives introduce relevant and engaging examples of international policy so students can extend their understanding of theory to policymaking across the globe New Empirical Evidence applications provide students with real world examples that are relevant to them from case studies about Sweden and China to global examples that compare experiences between countries Updated end of chapter questions broaden critical thinking encouraging students to apply their knowledge to international and comparative examples The results of econometric models are used to help students understand how expenditure and tax policies affect individual behavior and how governments set policies Integrated theory and analysis Institutional theoretical and empirical material is interwoven to provide students with a clear and coherent view of how government spending and taxation relate to economic theory Current research is presented alongside discussion of methodological and substantive controversies The approach is modern theoretical and empirical and shared by most active economists Institutional and legal settings are described in detail and the links between economic analysis and current political issues are emphasized This Global Edition has been adapted to meet the needs of courses outside of the United States and does not align with the instructor and student resources available with the US edition     **Green Transportation Logistics** Harilaos N. Psaraftis,2015-07-13 This book examines the state of the art in green transportation logistics from the perspective of balancing environmental performance in the transportation supply chain while also satisfying traditional economic performance criteria Part of the book is drawn from the recently completed European Union project Super Green a three year project intended to promote the development of European freight corridors in an environmentally friendly manner Additional chapters cover both the methodological base and the application context of green transportation logistics Individual chapters look at the policy

context the basics of transportation emissions Green Corridors basics the concept of TEN T Trans European Network Benchmarking of green corridors the potential role of ICT Information and Communication Technologies Green vehicle routing Reducing maritime CO2 emissions via market based measures and speed and route optimization Sulphur emissions Lifecycle emissions Green rail transportation Green air transportation Green inland navigation and possible areas for further research Throughout the book pursues the goal of win win solutions and analyzes the phenomenon of push down pop up wherein a change in one aspect of a problem can cause another troubling aspect to arise For example speed reduction in maritime transportation can reduce emissions and fuel costs but could require additional ships and could raise in transit inventory costs Or regulations to reduce sulphur emissions may ultimately increase CO2 elsewhere in the supply chain The book takes stock at the various tradeoffs that are at stake in the goal of greening the supply chain and looks at where balances can be struck
