**Reproductive Labor and Innovation** Jennifer Denbow,2024-09-27 In Reproductive Labor and Innovation Jennifer Denbow examines how the push

toward technoscientific innovation in contemporary American life often comes at the expense of the care work and reproductive labor that is necessary for society to function Noting that the gutting of social welfare programs has shifted the burden of solving problems to individuals Denbow argues that the aggrandizement of innovation and the degradation of reproductive labor are intertwined facets of neoliberalism She shows that the construction of innovation as a panacea to social ills justifies the accumulation of wealth for corporate innovators and the impoverishment of those feminized and racialized people who do the bulk of reproductive labor Moreover even innovative technology aimed at reproduction such as digital care work platforms and noninvasive prenatal testing obscure structural injustices and further devalue reproductive labor By drawing connections between innovation discourse the rise of neoliberalism financialized capitalism and the social and political degradation of reproductive labor Denbow illustrates what needs to be done to destabilize the overvaluation of innovation and to offer collective support for reproduction      *Outlook* Alfred Emanuel Smith, Francis Walton, 1878
