Academic and Professional Writing in an Age of Accountability Shirley Wilson Logan, Wayne H. Slater, 2018-12-27

What current theoretical frameworks inform academic and professional writing What does research tell us about the effectiveness of academic and professional writing programs What do we know about existing best practices What are the current guidelines and procedures in evaluating a program s effectiveness What are the possibilities in regard to future research and changes to best practices in these programs in an age of accountability Editors Shirley Wilson Logan and Wayne H Slater bring together leading scholars in rhetoric and composition to consider the history trends and future of academic and professional writing in higher education through the lens of these five central questions The first two essays in the book provide a history of the academic and professional writing program at the University of Maryland Subsequent essays explore successes and challenges in the establishment and development of writing programs at four other major institutions identify the features of language that facilitate academic and professional communication look at the ways digital practices in academic and professional writing have shaped how writers compose and respond to texts and examine the role of assessment in curriculum and pedagogy An afterword by distinguished rhetoric and composition scholars Jessica Enoch and Scott Wible offers perspectives on the future of academic and professional writing This collection takes stock of the

historical rhetorical linguistic digital and evaluative aspects of the teaching of writing in higher education Among the critical issues addressed are how university writing programs were first established and what early challenges they faced where writing programs were housed and who administered them how the language backgrounds of composition students inform the way writing is taught the ways in which current writing technologies create new digital environments and how student learning and programmatic outcomes should be assessed

Walkout! Diana D'Amico Pawlewicz, 2022-08-01 Teacher unions and their members have long stood as polarizing figures in a vast educational landscape As in the Western films of the 1920s policymakers education reformers and onlookers often assign union leaders and the teachers they represent either the white hats of heroes or the black hats of villains Politicized efforts to reductively classify teacher unions as beneficial or dangerous have only served to obscure the extent to which labor militancy and teacher activism have become part and parcel of the American public school system and the primary mechanisms by which teachers voices are heard and heeded in the policy arena Teacher unions have grown in tandem with and in response to the expansion of the school bureaucracy and the acceleration of accountability reforms and teachers calls for recognition and reform are inseparable from broader movements for social change Far more than either good or bad teacher unions are the inevitable outgrowth of American public education as it stands today This book offers an interdisciplinary exploration of the state of modern teacher unions the complex spaces they operate in and the connections between militancy activism and school reform Breaking free from the white hat black hat dyad that has for so long colored the lenses we use to understand unions the chapters of this book engage a set of fundamental questions Where did the modern moment of militancy come from and in what ways is it a continuation or a departure from the approaches of previous organized teachers What is at stake in modern expressions of militancy for teachers communities and schools Beyond the flashpoint of the walkout what is the effect of teacher activism
