Forever Is Over English Edition:

Divine Truth or Human Tradition? Patrick Navas, 2011-07-07 In *Divine Truth or Human Tradition* the author critically examines the viewpoints and Scripture expositions of prominent evangelical scholars and apologists including Dr James R White author of *The Forgotten Trinity* Dr John MacArthur President of The Master's Seminary Wayne Grudem author of the widely read *Systematic Theology* Robert Morey author of *The Trinity Evidence and Issues* Robert L Reymond author of *A New Systematic Theology of the Christian Faith* and others According to what has long been considered mainstream Christian orthodoxy the doctrine of the Trinity the idea that the one God of the Bible is a singular being made up of three coequal and coeternal persons is not only central to the Christian faith but even necessary for one to accept in order to be counted as a true Christian and be saved Such a demand on a Christian's faith has come across as strange and perplexing to many especially so in light of the fact pointed out by one respected Trinitarian The Trinity is not clearly or explicitly taught anywhere in Scripture yet it is widely regarded as a central doctrine indispensable to the Christian faith In this regard it goes contrary to what is virtually an axiom that is a given a self evident truth of biblical doctrine namely that there is a direct correlation between the scriptural clarity of a doctrine and its cruciality to the faith and life of the church Millard J Erickson *God in Three Persons* p 11 Emphasis added Understandably this fact has raised questions in the minds of Christians and truth seekers alike ever since the doctrine was first articulated in the late 4th century Many Christians have wondered How can a doctrine that is not clearly or explicitly taught in the Bible be necessary to accept in order to be a true practitioner of the Christian faith

availability of fossil fuels creates international tensions and where global disaster from proliferating technology lurks on the horizon the search for alternative synthetic fuels is no longer an idle scientist's dream it is necessity Hydrogen with its vast and ready availability from water its nearly universal utility and its inherently benign characteristics is one of several attractive synthetic fuels being considered for a post fossil fuel world and it may well be the miracle fuel of the future It is of special interest because technically at least it is so easily produced and because it produces simple water vapor in the combustion process rather than loading an already burdened environment with more hydrocarbons carbon dioxide and monoxide sulfur particulate matter and even more exotic pollutants Journalist Peter Hoffmann describes worldwide scientific work toward a future hydrogen economy looking at the auspicious prospects of this potential fuel at its applicability to powering everything from automobiles to airplanes and at the principles and technologies involved in making hydrogen a viable energy alternative He examines how and how soon nature's simplest element may become available as an energy carrier as well as the economic conditions that will accompany its introduction and the social impact of clean hydrogen energy The picture he paints of the fuel future is a welcome alternative to the now common prognostications of impending doom
