The NexStar User's Guide Michael Swanson, 2012-12-06 Michael Swanson's online discussions with literally thousands of NexStar owners made it clear that there was a desperate need for a book such as this one that provides a complete detailed guide to buying using and maintaining NexStar telescopes. Although this book is highly comprehensive it is suitable for beginners there is a chapter on Astronomy Basics and experts alike. Celestron's NexStar telescopes were introduced in 1999 beginning with their first computer controlled go to model a 5 inch. More models appeared in quick succession and Celestron's new range made it one of the two dominant manufacturers of affordable go to telescopes. **User's Guide to XCELL+ Factory Modeling System** Richard Walter Conway, John O. McClain, 1987 Timecode A User's Guide J. Ratcliff, 1999-04-23 Recent radical changes in timecode technology location shooting and post production working practices have been brought about by the fragmentation of the television programme making industry and by a dramatic increase in affordable digital transmission and editing equipment and systems. With the expansion of non traditional television service producers cable satellite and video on demand almost anything goes as far as shooting and editing formats are concerned. Timecode A User's Guide is an indispensable reference for anyone needing to get to grips with the many aspects of timecode whether in house or on location. Taking into account these changes this book has now been brought completely up to date to include timecode and DVD LTC VITC in HANC packets in the serial digital TV interfaces timecode in IEEE1395 Firewire timecode and digital video cassettes new recording formats of DVD DV mini cassettes and D6 are included 4:3 scanning for wide screen films standards updated new material to cover new working practices new appendices to cover the global LPT time data transmissions and time data embedded in BBC transmissions.
