Beyond Books, Butts, and Buses Rebecca Good, 2014-03-18 *Beyond Books Butts and Buses* Ten Steps to Help Assistant Principals Become Effective Instructional Leaders is intended for ambitious future principals who recognize the importance of researching and preparing for that esteemed position. It contains ten steps that will lead those who are stuck in the duty world of books butts and buses to find ways to prepare for instructional leadership. This book lays out strategies, suggestions, and checklists that will help support the learning. There are scripts, organizational tools, and rationales for following through on the implementation of these steps. There are also samples of different types of walk-throughs, agendas, and planners to help one get and stay organized. A campus administrator position is a hectic crisis of the moment type of job, and these chapters address how to handle these moments or how to head them off. The need for balance in one's life is spoken to as well, with a chapter devoted to how to avoid burnout. This is a must-read for assistant principals serious about wanting to prepare themselves for the top position in a school. *Tech Timeout, Grade 3*, 2016-05-02 Turn off the technology and get back to basics. *Tech Timeout* for grade 3 features engaging arts and crafts activities, puzzles, games, and physical exercises that children can complete independently or with friends. It's important to remind children that learning doesn't have to take place in front of screens. Children need time away from technology to develop critical thinking and communication skills. The *Tech Timeout* series promotes fun, active learning that benefits children's academic growth and physical health. Each book is bursting with activities that improve concentration skills, stimulate creativity, and encourage outdoor adventures. **30**

Mathematics Lessons Using the TI-15 Pamela Dase, 2009-11-21 This book is designed for grades 3-5 instruction and provides step-by-step mathematics lessons that incorporate the use of the TI-15 calculator throughout the learning process. The 30 lessons included present mathematics in a real-world context and cover each of the five strands: number and operations, geometry, algebra, measurement, and data analysis and probability. *30 Mathematics Lessons Using the TI-15* is correlated to the Common Core State Standards and supports core concepts of STEM instruction. 256pp plus Teacher Resource CD. New Formulas for America's Workforce, 2003 **Facilitator's Guidebook for Use of Mathematics Situations in Professional Learning** Rose Mary Zbiek, Glendon W. Blume, M. Kathleen Heid, 2018-01-01 The depth and breadth of a mathematics teacher's understanding of mathematics matter most as the teacher engages in the daily work of teaching. One of the major challenges to teachers is to be ready to draw on the relevant mathematical ideas from different areas of the school curriculum and from their postsecondary mathematics experiences that can be helpful in explaining ideas to students, making instructional decisions, creating examples, and engaging in other aspects of their daily work. Being mathematically ready and confident requires teachers to engage in ongoing professional learning that helps them to connect mathematics to events like those they live on a daily basis. The purpose of this volume is to provide teachers, teacher educators, and other facilitators of professional learning opportunities with examples of authentic events and tools for

discussing those events in professional learning settings The work shared in Facilitator's Guidebook for Use of Mathematics Situations in Professional Learning Guidebook resulted from a collaborative effort of school mathematics supervisors and university mathematics educators The collaborators joined their varied experiences as teachers coaches supervisors teacher educators and researchers to suggest ways to scaffold activities encourage discussion and instigate reflection with teacher participants of differing mathematics backgrounds and with varying teaching assignments Each guide has ideas for engaging and furthering mathematical thought across a range of facilitator and participant mathematics backgrounds and draws on the collaborators' uses of the Situations with in-service and prospective teachers The events and mathematical ideas connected to each event come from Situations in Mathematical Understanding for Secondary Teaching A Framework and Classroom Based Situations A Situation is a description of a classroom related event and the mathematics related to it For each of six Situations school and university collaborators developed a facilitator's guide that presents ideas and options for engaging teachers with the event and the mathematical ideas The Guidebook also contains suggestions for how teachers and others might develop new Situations based on events from their own classrooms as a form of professional learning Both teacher educators and school-based facilitators can use this volume to structure sessions and inspire ideas for professional learning activities that are rooted in the daily work of mathematics teachers and students
