Brexit William Outhwaite, 2017-02 Soon after the UK referendum in June 2016 sociologists and other social scientists began to evaluate the implications of the decision

both for the UK and more importantly for the European Union Europe and the world Some of these consequences were immediately evident The vote revealed cleavages across the UK on a regional and class basis paralleled for example in the support in France for the extreme right Front National versus the Socialist Party In the UK there has been a revival of a kind of class politics in which working class voters swing right rather than left The regional divisions are hard to explain the most deprived areas of the UK which have benefited substantially from EU development aid were often those most hostile to UK membership of the EU In the rest of Europe the vote has opened up as a serious prospect what was previously only a pipe dream of the political fringes withdrawal from the EU itself Although one can put this in the context of the Union's failure to attract the support of enough voters in Norway and Switzerland for membership the shock effect is incomparably greater The UK was always a semi detached member state with opt outs from Schengen and the euro but it still carried substantial weight in the formation of EU policy Although one of the immediate responses has been a rise in support for the EU across much of Europe Brexit has massively strengthened the forces of mostly right wing populist insurgent politics adding withdrawal to the more local themes of migration and islamization which play out in different variations across Europe Brexit aims to trace the implications of the UK's projected withdrawal from the EU locating short term political fluctuations in a broader historical and social context of the transformation of European and global society It provides a forum for leading Eurosociologists broadly defined working inside and outside the UK to rethink their analyses of the European project and its prospects as well as to reflect on the likely implications for the UK
