

CHAPTER 1 - HUMAN GEOGRAPHY-NATURE AND SCOPE

DEFINITIONS OF HUMAN GEOGRAPHY

1. "Human geography is the synthetic study of relationship between human societies and earth's surface". -**Ratzel**
* **Synthesis** has been emphasised
2. "Human geography is the study of "the changing relationship between the unresting man and the unstable earth." -**Ellen C. Semple**
* **Dynamism** has been emphasised
3. "Conception resulting from a more synthetic knowledge of the physical laws governing our earth and of the relations between the living beings which inhabit it". - **Paul Vidal de la Blache**
* **Interrelationship** has been emphasised.

CONCEPTS OF ENVIRONMENTAL DETERMINISM, POSSIBILISM AND NEO DETERMINISM

1. ENVIRONMENTAL DETERMINISM

- * In the early stages, human were greatly adapted to the dictates of Nature because the level of technology was very low.
- * There is direct dependence of human beings on nature for resources which sustained them.
- * The physical environment for such societies became the "Mother Nature".
- * This type of interaction between primitive human society and strong forces of nature was termed as **Environmental determinism**.
- * At that stage of very low technological development, human got naturalised who listened to Nature, was afraid of its fury and worshipped it.

2. POSSIBILISM

- * with the social and cultural development, humans develop better and more efficient technology.
- * **They move from a state of necessity to a state of freedom.**
- * Human creates possibilities with the resources obtained from the environment
- * **Here man is capable to modify his environment by making use of numerous possibilities offered by nature.**
- * Such a man- nature relationship is termed as **Possibilism**.
- * Nature provides opportunities and human being make use of these and slowly nature gets humanised

3. NEO DETERMINISM/STOP AND GO DETERMINISM

- * Developed by **Griffith Taylor**.
- * It is a middle path concept between environmental determinism and possibilism.
- * **As per this concept, neither there is a situation of absolute necessity nor is there a condition of absolute freedom.**
- * It means that possibilities can be created within the limits which do not harm the environment and there is no free run without accidents.
- * **The Neo -Determinism attempts to bring a balance nullifying the "either" "or" dichotomy.**

Geography Focus Stage Chapter Answers:

How To Do Your Dissertation in Geography and Related Disciplines Tony Parsons, Peter G Knight, 2015-02-20 This book provides undergraduates with a step by step guide to successfully carrying out an independent research project or dissertation The book addresses each stage of the project by answering the questions that a student is likely to ask as the work progresses from choosing the subject area and planning the data collection through to producing illustrations and writing the final report Most undergraduates in geography and related disciplines are required to undertake individual projects as part of their degree course this book is a source of constructive practical advice This new third edition continues the tradition of friendly well informed but informal support and continues to focus on answering the specific questions that students typically ask at each stage of the project The new edition brings the text completely up to date by taking into account changes within the discipline and changes in the ways that students work New digital media social networking mobile technology e journals anti plagiarism software ethics approval rules and risk assessments are among the issues that this new edition takes into account The new edition also broadens the book s appeal by extending its coverage of the wide range of different approaches to geographical research with expanded coverage of qualitative research Geographic Information Systems and new approaches to research design in both physical and human geographies

Techniques in Human Geography Jim Lindsay, 2006-05-05 The first concise guide to the purposeful use of techniques in human geography Examining key techniques in detail survey and qualitative numerical spatial and computer based the book draws on important case studies such as the decennial census to illustrate applications The importance of up to date IT based techniques is particularly stressed introducing widely recognised applications A final section explores the Internet which offers exciting new resources but also creates problems for researchers used to traditional academic fields

Musicking TikTok Juan Bermúdez, 2024-12-12 This ethnographic work about TikTok s musicking in a glocal Austrian context complements and build upon ethnomusicological assumptions theories and methods for the study of musical practices in digital spaces An overview of elements that make up TikTok s interface as well as the technical performative possibilities that it allows this book introduces a general categorization of existing performance types and how TikTokers appropriate the platform to make their music It illustrates how some TikTokers became aware of and began using TikTok and it reviews some of the different strategies TikTokers apply to learn how to use the application and successfully develop their performances Berm dez explores how performers move from being ordinary users to becoming TikTokers developing and performing an identity he calls TikTok Persona Moreover he discusses how some TikTok practices can and have occurred across multiple interconnected platforms and he examines how localities are articulated and negotiated in these contexts Berm dez argues for an understanding of musicking as a multimedia practice that different actors create and experience individually in everyday synchronous and asynchronous physical and digital situations The so called TikTokers create a sense of identity and

community through their performances This study suggests that a digital performance can be aside from a representation of reality an integral part of it serving as a fundamental space for constructing and performing identity

The Context Marketing Revolution Mathew Sweezey, 2020-03-24 In a world of limitless media noise how can businesses break through to customers Context We are in the midst of a massive media revolution For the first time in history ordinary people around the world have the ability to create distribute and consume content instantly from anywhere using connected devices The massive increase in media noise created by these consumers and devices creates an entirely new situation that makes conventional marketing models obsolete And yet countless companies and marketing organizations continue to rely on traditional models assuming that their campaigns will sway customers They couldn't be more wrong In this provocative and practical book Salesforce marketing maven Mathew Sweezey boldly outlines this new infinite media environment and poses a profound question In a transformed world where customers shape their own experience what is the key to breaking through and motivating them to buy It is context the close linkage between an individual's immediate desires and the experiences a brand creates to fulfill them Drawing on new research and new insights into current consumer psychology Sweezey defines the five key elements of context Customer experiences must be Available Helping people achieve the value they seek in the moment Permissioned Giving people what they've asked for on their terms Personal Going beyond how personal it is to how personally you can deliver it Authentic Combining voice empathy and brand congruence simultaneously Purposeful Creating a deeper connection to the brand beyond the product Sweezey uses vivid examples to highlight a new marketing model used by high performing brands big and small The final part of the book shifts to execution providing a new rule book for context based marketing The Context Marketing Revolution will change forever how you think about the purpose and practice of marketing

The Sustainability Curriculum Cedric Cullingford, John Blewitt, 2013 The links between education and sustainable development are deepening although subject to much controversy and debate The success of the sustainability discourse depends both on the pedagogic and research functions of higher education Similarly for higher education itself to remain relevant and engaged it faces pressure not only to integrate the insights and lessons drawn from the perspective of sustainable development but also to be responsive to scrutiny of its own practices in relation to sustainability Among professionals in higher education sustainable development has its supporters and detractors It is embraced by some individuals and departments while being perceived by others as a threat to the coherence of particular disciplines Although it is not currently an academic discipline in its own right increasing public and professional familiarity with the term and the increasing urgency of global calls for the implementation of sustainable development mean that this is rapidly changing This volume analyses the impact of the concepts and practices of sustainability and sustainable development on various academic disciplines institutional practices fields of study and methods of enquiry The contributors drawn from a wide range of disciplines perspectives educational levels and institutional contexts examine the purpose of the modern university and the

nature of sustainable education which includes exploring links to social movements for sustainability projects curriculum change culture and biodiversity values relating to gender equality and global responsibility and case studies on the transformation or otherwise of some specific disciplines **World History** Larry S.
