The common feature underlying all of the strategies described in this book is their emphasis on actively engaging students who seek to make sense of natural objects and events. Many of the strategies we highlight emerge from a constructivist view of learning that has gained widespread acceptance in recent years. In this view, learners make sense of the world by forging connections between new ideas and those that are part of their existing knowledge base. For most students, that knowledge base is riddled with a host of naïve notions, misconceptions, and alternative conceptions they have acquired throughout their lives. To a considerable extent, the job of the teacher is to coax out these ideas to help students understand how their ideas differ from the scientifically accepted view, to assist as students restructure and reconcile their newly acquired knowledge, and to provide opportunities for students to evaluate what they have learned and apply it in novel circumstances. Clearly, this prescription demands far more than most college and university scientists have been prepared for. *Army, Navy, Air Force Journal & Register*, 1948 **Resources in Education**, 1996-04 *The High School Teacher*, 1929 *Research in Education*, 1974 **Listening to Our Students and Transcending K-12 to Save Our Nation** Alec Ostrom, Brian Hack, Don Prentice, 2020-01-06. This journey will engage you in dealing with some hard truths and it will take you down a new pathway and new ways of thinking about K-12 education. We now live in a nation that is struggling with deep social, economic, and political conflicts. We are all doing our best to resolve these conflicts and to solve the critical challenges that we all face in the Digital Age, but our children and young adults are having a very difficult time in dealing with the realities of their young lives. We wrote this book because we want to engage all of our readers in each local community in frank, honest, down-to-earth practical conversations about our K-12 schools as the foundation for our constitutional democracy. Without well-educated citizens, our government, our economy, and our society will not survive. And this is true regardless of the political beliefs of our readers across the political spectrum.
