## Unit 9: Circles Performance Tasks

Instructions: Choose one performance task. Write all your work on a separate clean piece of paper and attach it to this page.

### Big Idea: Reasoning and Proof

You can use triangle congruence theorems to prove relationships among tangents and secants.

#### Performance Task 1

Four tangents are drawn from  $E$  to two concentric circles.  $A$ ,  $B$ ,  $C$ , and  $D$  are the points of tangency. Name as many pairs of congruent triangles as possible and tell how you can show each pair is congruent.

### Big Idea: Measurement

You can use facts about arcs and angle measures to solve real-world problems.

#### Performance Task 2

The rocks near the shore between two lighthouses at points  $A$  and  $B$  make the waters unsafe. The measure of  $\widehat{AXB}$  is  $300^\circ$ . Waters inside this arc are unsafe. Suppose you are a navigator on a ship at sea. How can you use the lighthouses to keep the ship in safe waters? Explain your answer.

### Big Idea: Coordinate Geometry

You can use coordinates of the center of a circle and its radius to write an equation of a circle.

#### Performance Task 3

A gardener wants the three rosebushes in her garden to be watered by a rotating water sprinkler. The gardener draws a diagram of the garden using a grid in which each unit represents 1 ft. The rosebushes are at  $(1,3)$ ,  $(5,11)$ , and  $(11,4)$ . She wants to position the sprinkler at a point equidistant from each rosebush. Where should the gardener place the sprinkler? Show your work. What equation described the boundary of the circular region that the sprinkler will cover?

**A Collection of Performance Tasks & Rubrics: High School Mathematics** Charlotte Danielson, Elizabeth Marquez, 2014-05-22 This book provides a collection of performance tasks and scoring rubrics for a number of important topics in high school mathematics Included are many samples of student work which clarify the tasks and anchor the points of the scoring rubrics *Designing Authentic Performance Tasks and Projects* Jay McTighe, Kristina J. Doubet, Eric M. Carbaugh, 2020-02-18 Aimed at the growing number of educators who are looking to move beyond covering the curriculum *Designing Authentic Performance Tasks and Projects* provides a comprehensive guide to ensuring students deeper learning in which they can transfer their knowledge skills and understandings to the world beyond the classroom Readers will learn how to Create authentic tasks and projects to address both academic standards and 21st century skills Apply task frames to design performance tasks that allow voice and choice for students Design and use criterion based evaluation tools and rubrics for assessment including those for students to use in self assessment and peer assessment Incorporate performance based instructional strategies needed to prepare students for authentic performance Differentiate tasks and projects for all students including those needing additional support or challenge Effectively manage the logistics of a performance based classroom Use project management approaches to facilitate successful implementation of tasks and projects Develop performance based curriculum at the program school and district levels Authors Jay McTighe Kristina J Doubet and Eric M Carbaugh provide examples and resources across all grade levels and subject areas Teachers can use this practical guidance to transform their classrooms into vibrant centers of learning where students are motivated and engaged and see relevance in the work they are doing *Designing and Using Performance Tasks* Tracey K. Shiel, 2016-09-14 Stretch student thinking with performance based tasks With the continual increase of high stakes assessments also comes the surge of professional development on designing performance based tasks Providing step by step insights this book shows you how to incorporate performance tasks as a tool to teach monitor and extend student learning If you re ready to stretch your students thinking grab a copy of this how to guide to help you Make instructional decisions based on student performance of learning tasks Incorporate learning progressions as an integral part of planning performance tasks Close the knowing doing gap by focusing on considerations for successful implementation [Mathematical Challenges For All](#) Roza Leikin, 2023-03-17 This book argues that mathematical challenge can be found at any level and at every age and constitutes an essential characteristic of any mathematics classroom aimed at developing the students mathematical knowledge and skills Since each mathematics classroom is heterogeneous with respect to students mathematical potential quality mathematical instruction results from matching the level of mathematical challenge to different students potential Thus effective integration of mathematical challenge in the instructional process is strongly connected to the equity principle of mathematics education In the three sections in this volume readers can find diverse views on mathematical challenges in curriculum and instructional design

kinds and variation of mathematically challenging tasks and collections of mathematical problems Evidence based analysis is interwoven with theoretical positions expressed by the authors of the chapters Cognitive social and affective characteristics of challenging mathematical activities are observed and analyzed The volume opens new avenues of research in mathematics education and pose multiple questions about mathematical instruction rich in mathematical challenge for all The authors invite readers to explore and enjoy mathematical challenges at different levels

*The Cambridge Handbook of Expertise and Expert Performance* K. Anders Ericsson,Robert R. Hoffman,Aaron Kozbelt,A. Mark Williams,2018-05-17 In this updated and expanded edition of The Cambridge Handbook of Expertise and Expert Performance some of the world s foremost experts on expertise share their scientific knowledge of expertise and expert performance and show how experts may differ from non experts in terms of development training reasoning knowledge and social support The book reviews innovative methods for measuring experts knowledge and performance in relevant tasks Sixteen major domains of expertise are covered including sports music medicine business writing and drawing with leading researchers summarizing their knowledge about the structure and acquisition of expert skills and knowledge and discussing future prospects General issues that cut across most domains are reviewed in chapters on various aspects of expertise such as general and practical intelligence differences in brain activity self regulated learning deliberate practice aging knowledge management and creativity

*Prejudice* Janet K. Swim,Charles Stangor,1998-05-07 Prejudice The Target s Perspective turns the tables on the way prejudice has been looked at in the past Almost all of the current information on prejudice focuses on the person holding prejudiced beliefs This book however provides the first summary of research focusing on the intended victims of prejudice Divided into three sections the first part discusses how people identify prejudice what types of prejudice they encounter and how people react to this prejudice in interpersonal and intergroup settings The second section discusses the effect of prejudice on task performance assessment of ones own abilities self esteem and stress The final section examines how people cope with prejudice including a discussion of coping mechanisms reporting sexual harassment and how identity is related to effective coping Includes an introduction the consequences of prejudice and how to cope with prejudice The editors are top researchers in the field of prejudice All the contributors are major figures in the social psychological analysis of intergroup relationships

**Self-regulation of Learning and Performance** Dale H. Schunk,Barry J. Zimmerman,2023-01-06 In recent years educators have become increasingly concerned with students attempts to manage their own learning and achievement efforts through activities that influence the instigation direction and persistence of those efforts In 1989 Zimmerman and Schunk edited the first book devoted to this topic They assembled key theorists offering a range of perspectives on how students self regulate their academic functioning One purpose of that volume was to provide theoretical direction to ongoing

as well as nascent efforts to explore academic self regulatory processes Since that date there has been an exponential surge in research This second volume on academic self regulation offers the fruits of the first generation of research It also addresses a number of key issues that have arisen since then such as how self regulation differs from such related constructs as motivation and metacognition and whether students can be taught self regulatory skills The contributors reveal an interesting uplifting and at times disturbing picture of how students grapple with the day to day problems of achieving in circumstances with inherent limitations and obstacles This volume provides insight into the source of students capabilities to surmount adversities the origins of their self initiated processes designed to improve learning motivation and achievement The text is organized on the basis of a conceptual framework that analyzes academic self regulation into four major dimensions That model is presented in the first chapter and key processes that influence each of these dimensions are discussed by prominent researchers in the chapters that follow Because each chapter is written to follow a common format this work provides a level of continuity and parsimony normally found only in authored textbooks

**Getting Ready for College, Careers, and the Common Core** David T. Conley, 2013-10-07 Create programs that prepare students for college careers and the new and challenging assessments of the Common Core State Standards Written for all educators but with an emphasis on those at the secondary level this important resource shows how to develop programs that truly prepare students for both the Common Core assessments and for college and career readiness Based on

multiple research studies conducted by Conley as well as experience he has gained from working with dozens of high schools that succeed with a wide range of students the book provides specific strategies for teaching the CCSS in ways that improve readiness for college and careers for the full range of students Draws from research based models for creating programs for high school students that will ensure readiness for tests and for college and beyond Includes strategies and practices for teachers to help students develop postsecondary preparedness Is the third in a series of books on readiness written by David Conley including College Knowledge and College and Career Ready Teachers can use this valuable resource to understand the big picture behind the Common Core State Standards how to teach to them in ways that prepare students for new challenging assessments being implemented over the next few years and more importantly how to help all students be ready for learning beyond high school

Connecting Self-regulated Learning and Performance with Instruction Across High School Content Areas Maria K. DiBenedetto, 2018-07-23 This book shows how principles of self regulated learning are being implemented in secondary classrooms The 14 chapters are theoretically driven and supported by empirical research and address all common high school content areas The book comprises 29 lesson plans in English language arts natural and physical sciences social studies mathematics foreign language art music health and physical education Additionally the chapters address students with special needs technology and homework Each chapter begins with one or more lesson plans written by master teachers followed by narratives explaining how the lesson plans were implemented The chapters conclude with an analysis written by expert researchers of the self regulated learning elements in the lessons Each lesson and each analysis incorporate relevant educational standards for that area Different types of high schools in several states serve as venues This powerful new book edited by Maria K DiBenedetto provides a unique and invaluable resource for both secondary teachers and researchers committed to supporting adolescents in the development of academic self regulation Each chapter is jointly written by teachers who provide a wealth of materials including lesson plans and researchers who situate these lesson plans and academic self regulation goals within the larger work on self regulation The topics covered are far broader than any other book I have seen in terms of developing academic self regulation covering over a dozen content areas including literacy mathematics social studies the sciences and the arts Teachers and scholars alike will find this book a must read Karen Harris EdD Arizona State University A practical and magnificent blend of educational research and application This book goes beyond presenting the findings of research on self regulation by connecting detailed strategies that align with the standards to the research DiBenedetto et al clearly illustrate how to develop self regulated learners in the classroom A refreshing must read for all secondary educators and educational researchers seeking to be well grounded in education research and practical application techniques Heather Brookman PhD Fusion Academy Park Avenue Self regulated learning is a research based process by which teachers help students realize their own role in the learning process Connecting Self Regulated Learning and Performance with Instruction Across High School Content Areas consists of model teachers lessons

and analyses by prominent educational psychologists in the field of self regulated learning The book provides teachers with the tools needed to increase students awareness of learning and inspires all educators to use self regulated learning to promote engagement motivation and achievement in their students The book also provides administrators with the principles needed to infuse evidenced based self regulated learning into their curriculum and instruction I highly recommend the book
