Student Exploration: Seed Germination

Directions: Follow the instructions to go through the simulation. Respond to the questions and prompts in the orange boxes.

Vocabulary: controlled experiment, germinate, hypothesis, mean, seed, trial, variable

Prior Knowledge Question (Do this BEFORE using the Gizmo.)

Plants that produce fruit or vegetables grow from **seeds**. Suppose you want to start a vegetable garden using seeds. How could you get the seeds to sprout?

To ensure that the seeds form roots, I would plant them in healthy soil.

Gizmo Warm-up

Seeds are only able to sprout, or **germinate**, under the right conditions. The seeds of different species of plants need different amounts of light, temperatures, and moisture levels in order to germinate successfully.

In the *Seed Germination Gizmo*, you will perform a series of experiments to determine the best conditions for germinating three different types of seeds.

1. Look at the **DESCRIPTION** tab. How many seeds are in the germination chamber?

100

2. Click **Play** (▶), and observe the **SIMULATION** pane.

- A. What happened over the simulated five-day period?

While some seeds failed to germinate, others did

- B. How does the appearance of a seed on the **SIMULATION** pane change once the seed has sprouted?

When it grows, a yellow, upward-pointing object that resembles a vine appears from the seed.

- C. How many seeds sprouted?

55

- D. How many seeds did not sprout?

45
