Artificial Intelligence and Machine Learning Applications for Sustainable Development A. J. Singh, Nikita Gupta, Sanjay Kumar, Sumit Sharma, Subho Upadhyay, Sandeep Kumar, 2025-01-28 The book highlights how technologies including artificial intelligence and machine learning are transforming renewable energy technologies and enabling the development of new solutions It further discusses how smart technologies are employed to optimize energy production and storage enhance energy efficiency and improve the overall sustainability of energy systems This book Discusses artificial intelligence based techniques namely neural networks fuzzy expert systems optimization techniques and operational research Showcases the importance of artificial intelligence and machine learning in the energy market demand analysis and forecasting of renewable energy applications Illustrates strategies for sustainable development using artificial intelligence and machine learning applications Presents applications of artificial intelligence in the domain of electronics transformation and development smart cities and renewable energy utilization Highlights the role of artificial intelligence in solving problems such as image and signal processing smart weather monitoring smart farming and distributed energy sources It is primarily written for senior undergraduates graduate students and academic researchers in diverse fields including electrical electronics and communications energy and environmental engineering *Proceedings of the 7th FIRST 2023 International Conference on Global Innovations (FIRST-ESCSI 2023)* Nyayu Latifah Husni, Wahyu Caesarendra, Martha Aznury, Leni Novianti, Deris Stiawan, 2024-02-27 This is an open access book The 7th FIRST Forum in Research Science and Technology 2023 International Conference on Global Innovations is a prestigious gathering of thought leaders industry experts and visionaries who are dedicated to exploring and promoting innovative solutions to the world's most pressing challenges This conference provides a unique platform for collaboration knowledge sharing and networking fostering a global community of change makers This conference is held in conjunction with the forming of South Sumatra Vocational Higher Education or Technical and Vocational Education and Training TVET consortium Technical and Vocational Education and Training TVET consortium is a forum for collaboration between vocational education units aimed at supporting the revitalization of Technical and Vocational Education and Training This consortium is formed in order to achieve harmony through a synergistic partnership the Directorate General of Vocational Education the Ministry of Education Culture Research and Technology Kemendikbudristek as well as stakeholders in the regions In order to support the Partnership Ecosystem Strengthening Program for Regional Potential Based Innovation Development **Introduction to Wireless Communications and Networks** Krishnamurthy Raghunandan, 2022-03-31 This book provides an intuitive and accessible introduction to the fundamentals of wireless communications and their tremendous impact on nearly every aspect of our lives The author starts with basic information on physics and mathematics and then expands on it helping readers understand fundamental concepts of RF systems and how they are designed Covering diverse topics in wireless communication systems

including cellular and personal devices satellite and space communication networks telecommunication regulation standardization and safety the book combines theory and practice using problems from industry and includes examples of day to day work in the field It is divided into two parts basic fundamentals and advanced elected topics Drawing on the author s extensive training and industry experience in standards public safety and regulations the book includes information on what checks and balances are used by wireless engineers around the globe and address questions concerning safety reliability and long term operation A full suite of classroom information is included *Blockchain Technology for Data Privacy Management* Sudhir Kumar Sharma,Bharat Bhushan,Aditya Khamparia,Parma Nand Astya,Narayan C.

Debnath,2021-03-21 The book aims to showcase the basics of both IoT and Blockchain for beginners as well as their integration and challenge discussions for existing practitioner It aims to develop understanding of the role of blockchain in fostering security The objective of this book is to initiate conversations among technologists engineers scientists and clinicians to synergize their efforts in producing low cost high performance highly efficient deployable IoT systems It presents a stepwise discussion exhaustive literature survey rigorous experimental analysis and discussions to demonstrate the usage of blockchain technology for securing communications The book evaluates investigate analyze and outline a set of security challenges that needs to be addressed in the near future The book is designed to be the first reference choice at research and development centers academic institutions university libraries and any institutions interested in exploring blockchain UG PG students PhD Scholars of this fields industry technologists young entrepreneurs and researchers working in the field of blockchain technology are the primary audience of this book *Intelligent Systems and Applications* W.C.-C. Chu,H.-C. Chao,S.J.-H. Yang,2015-04-14 This book presents the proceedings of the International Computer Symposium 2014 ICS 2014 held at Tunghai University Taichung Taiwan in December ICS is a biennial symposium founded in 1973 and offers a platform for researchers educators and professionals to exchange their discoveries and practices to share research experiences and to discuss potential new trends in the ICT industry Topics covered in the ICS 2014 workshops include algorithms and computation theory artificial intelligence and fuzzy systems computer architecture embedded systems SoC and VLSI EDA cryptography and information security databases data mining big data and information retrieval mobile computing wireless communications and vehicular technologies software engineering and programming languages healthcare and bioinformatics among others There was also a workshop on information technology innovation industrial application and the Internet of Things ICS is one of Taiwan s most prestigious international IT symposiums and this book will be of interest to all those involved in the world of information technology *Learn Robotics Programming* Danny Staple,2021-02-12 Design build and program AI driven robots from scratch using Python and Raspberry Pi while mastering real world robotics concepts sensor integration and camera based vision systems Key Features Learn hands on robotics by wiring coding and troubleshooting real hardware Integrate sensors cameras and voice agents to make your robot intelligent

Follow a structured path from Python basics to browser based robot control Book Description We live in an age where the most complex or repetitive tasks are automated Smart robots have the potential to revolutionize how we perform all kinds of tasks with high accuracy and efficiency With this second edition of Learn Robotics Programming you ll see how a combination of the Raspberry Pi and Python can be a great starting point for robot programming The book starts by introducing you to the basic structure of a robot and shows you how to design build and program it As you make your way through the book you ll add different outputs and sensors learn robot building skills and write code to add autonomous behavior using sensors and a camera You ll also be able to upgrade your robot with Wi Fi connectivity to control it using a smartphone Finally you ll understand how you can apply the skills that you ve learned to visualize lay out build and code your future robot building projects By the end of this book you ll have built an interesting robot that can perform basic artificial intelligence operations and be well versed in programming robots and creating complex robotics projects using what you ve learned What you will learn Leverage the features of the Raspberry Pi OS Discover how to configure a Raspberry Pi to build an AI enabled robot Interface motors and sensors with a Raspberry Pi Code your robot to develop engaging and intelligent robot behavior Explore AI behavior such as speech recognition and visual processing Find out how you can control AI robots with a mobile phone over Wi Fi Understand how to choose the right parts and assemble your robot Who this book is for This book is intended for robotics enthusiasts hobbyists and aspiring programmers with a basic understanding of Python who are interested in building intelligent AI enabled robots using Raspberry Pi It is ideal for learners who prefer a practical hands on approach

Optical Wireless Communications Murat Uysal,Carlo Capsoni,Zabih Ghassemlooy,Anthony Boucouvalas,Eszter Udvary,2016-08-25 This book focuses on optical wireless communications OWC an emerging technology with huge potential for the provision of pervasive and reliable next generation communications networks It shows how the development of novel and efficient wireless technologies can contribute to a range of transmission links essential for the heterogeneous networks of the future to support various communications services and traffic patterns with ever increasing demands for higher data transfer rates The book starts with a chapter reviewing the OWC field which explains different sub technologies visible light ultraviolet UV and infrared IR

communications and introduces the spectrum of application areas indoor vehicular terrestrial underwater intersatellite deep space etc This provides readers with the necessary background information to understand the specialist material in the main body of the book which is in four parts The first of these deals with propagation modelling and channel characterization of OWC channels at different spectral bands and with different applications The second starts by providing a unified information theoretic treatment of OWC and then discusses advanced physical layer methodologies including but not limited to advanced coding modulation diversity cooperation and multi carrier techniques and the ultimate limitations imposed by practical constraints On top of the physical layer come the upper layer protocols and cross layer designs that are the subject of the third part of the book The last part of the book features a chapter by chapter assessment of selected OWC applications Optical Wireless Communications is a valuable reference guide for academic researchers and practitioners concerned with the future development of the world's communication networks It succinctly but comprehensively presents the latest advances in the field

Smart Technologies in Data Science and Communication Kingsley A. Ogudo, Sanjoy Kumar Saha, Debnath Bhattacharyya, 2023-01-01 This book features high quality peer reviewed research papers presented at the Fifth International Conference on Smart Technologies in Data Science and Communication SMARTDSC 2022 held Koneru Lakshmaiah Education Foundation Guntur Andhra Pradesh India on 16 17 June 2022 It includes innovative and novel contributions in the areas of data analytics communication and soft computing
