J. Jacobs,2021-12-10 In 1962 South Korea assembled just 1 100 new automobiles By 1996 this total had soared to 2 812 714 What explains this remarkable growth The answer is complex and involves a combination of a supportive State timely technology alliances a skilled but historically low paid workforce aggressive pricing savvy entrepreneurs and fortuitous circumstances Despite this amazing ascent comparatively little has been written about the Korean auto industry in English In the first of a two volume set this 11

chapter book seeks to help fill this void by providing in depth examinations of all six of Korea's automakers from their beginnings through 1996. Uniquely written from the perspective of industry analysts at the time without knowledge of the Asian Fiscal Crisis, the book should prove informative to practitioners, scholars, and students interested in automotive history, international political economy, Asian studies, and more. *Journal of Public Transportation*, 2010

**The New Domestic Automakers in the United States and Canada** A.J. Jacobs, 2015-12-16

Over the past forty years, state, provincial, and local governments in the United States and Canada have provided foreign automakers with approximately \$4.80 billion in incentives in order to lure light vehicle assembly plants to their areas. This has included tax abatements, infrastructure construction, and giveaways, job training programs, and other subsidies. As of early 2015, ten foreign vehicle makers operated 20 light vehicles in developed North America. Despite the fact that all ten of these automakers have pursued a similar pattern—first exporting vehicles into the United States and Canada before launching vehicle plants in developed North America—each has followed its own specific historical development path and has created its own unique growth trajectory. This book provides a unique historical and qualitative review of these ten vehicle makers from their early beginnings to their export entry into the United States and/or Canada through early 2015. In addition, it chronicles the histories of more than a dozen former automakers and potential future foreign light motor vehicle assembly plants in the United States and Canada. This includes the first foreign automaker to build its cars in the United States, De Dion Bouton of France, in July 1900; the early 20th Century endeavors of Fiat, Mercedes, and Rolls Royce; and the present-day hopes of Chinese and Indian automakers. In the process, the text also provides an assessment of the top competing states and sites for any future plants, the possible incentives packages governments may offer to attract such facilities, and an estimated incentive value for each automaker. Overall, the goal of this book is to expand the knowledge of policymakers at all tiers of government in the United States and Canada and to help them take a more holistic look at the pros and cons of attracting Automobile Manufacturing FDI. It is hoped that this will enable them to make more informed decisions when pursuing a new foreign motor vehicle assembly plant. Its findings should also prove informative to urban and regional planning, political science, sociology, economics, labor, and international development scholars and students in North America and worldwide. *Indonesian Commercial Newsletter*, 2004-05
