

## 5. Service Description Template

Service Name	The agreed name for the service.
Service Description	A brief description of what the service does, and the expected outcomes.
Features	Briefly outline the main features and functionalities of the service.
Service Category	Classify the service into one of the categories previously agreed. Categories are important to provide the Service Catalogue with a hierarchical view of services.
Service Type	Customer-facing service or supporting service. A customer-facing service is an IT service that is visible to the customer. Typical data to be recorded are those connecting to the business, although information from the supporting layer can be recorded as well for internal use by the IT service provider. A supporting service is an IT service that is not directly used by the business, but is required by the IT service provider to deliver customer-facing services (for example, a directory service or a backup service). Supporting services may also include IT services only used by the IT service provider. Typical information to be recorded comes from the supporting layer.
Service Owner	Name and contact information of the person(s) with this role.
<b>Business Service Catalogue</b>	
Business Owner(s)	Name and contact information of the person(s) with this role.
Business Unit(s)	Business unit(s) to which the service is provided.
Business Impact	Describe the positive impact of having the service available and/or the negative impact if the opposite. The impact can be quantified by the number of users affected, the impact on cash flow, and the cost to the business.
Business Priority	Select from a previously agreed scale like Critical/Non-critical or High/Medium/Low.
Business Contacts	Name and contact information of the key business person(s) to be contacted.
Service Level Agreement (SLA)	It is usually better to provide a link to the document with the SLA encompassing the IT service.
Service Hours	Write here the agreed time period when the IT service should be available.
Escalation Contacts	Name and contact information of the person(s) to be contacted when an escalation procedure is triggered.
Service Reports	A list of the operational reports available for the IT service.
Service Reviews	Frequency of the service level review meetings.
Security Rating	Classify services to the security level of the IT service.

This document is a partial preview. Full document download can be found on Flevy:  
<http://flevy.com/browse/document/itil-service-catalogue-template-276>

Policies	Describe any policies governing the operation service.
<b>Technical Service Catalogue</b>	
Supporting Services	List any supporting services on which the IT service depends.
Services Supported	List any service this service is supporting.
Configuration Items (CI)	List of other CI supporting the IT service, including hardware, software, applications and data.

## **It Service Catalog Project Plan:**

*The Service Catalog* Mark O'Loughlin, 2010-07-13 The Service Catalog means many different things to many different people. However, most would agree that a catalog that helps customers and users to quickly identify the services they require clearly adds value. In turn, this helps organizations identify key services that support business processes, understand the contribution made by those services, and manage them appropriately. This well-constructed book provides practical advice and information that will help organizations to understand how to design and develop a service catalog and to understand the role that the service catalog performs within the service portfolio. Readers will gain practical information and knowledge that will help with understanding the full concept of the service catalog, understanding the scope of the service catalog, building an appropriate service catalog for your organization, identifying the true value that the service catalog can deliver to your organization, understanding services and the value that they provide to your organization, and customers managing the service catalog. In addition, a complete service catalog schematic is provided, and the service portfolio pyramid, which is unique to this book, is introduced, showing how all the pieces of the puzzle fit together. Widely researched and reviewed by some of the world's leading experts, this book provides a down-to-earth and practical resource for not only those who are developing Service Catalogs for the first time but also for those looking to refine their services according to agreed and established best practice concepts. *A Study Guide to Service Catalogue from the Principles of ITIL V3* Hank

Marquis, APMG-International, 2010 IT services are prevalent throughout virtually all businesses. Most enterprises and many government functions are totally dependent upon reliable and responsive IT services to underpin vital business, community, and social functions. IT services have become mainstream, and managing them to deliver value is the core message of ITIL V3, and the emphasis in ITIL V3 on service catalogue management is a direct result of the growing requirement for business and IT to work together, sharing data, information, and knowledge about demand for services, service capabilities, and patterns of business activity. The Service Catalogue Management process is now a very important management field, complete with its own terminology and vital concepts. This study guide outlines the concepts and principles underlying the service catalogue, discusses a project plan approach and reporting considerations, describes the value of a sound business case and the key relationships and touch points in the service catalogue management process. **Defining IT Success Through The**

**Service Catalog** Bill Fine, Rodrigo Flores, Troy DuMoulin, 2007-02-12 The Service Catalog is a fundamental IT tool covering the services themselves, default capabilities, measures, and primary means of access and provision. In short, it represents the value IT provides to facilitate business operations. Written by industry experts and using real case studies, this valuable title takes the reader beyond the theoretical to focus on the real business benefits of Service Catalogs and how to implement them successfully within an organization. Services are made standard and rational, leading to lower costs and increased service availability. Standard service products enable forecasting of demand, leading to better volume discounts from vendors, and

improved inventory and capacity planning Controls over consumption of services are enhanced The fulfillment of IT services is improved with the catalog Standardization of services leads to recurrent workflows rather than relatively expensive one off projects *Architecture and Patterns for IT Service Management, Resource Planning, and Governance* Charles T.
