Community Responses to Disasters in the Pacific Rim Shu-Mei Huang, Elizabeth Maly, 2023-12-07 Community Responses to Disasters in the Pacific Rim presents different aspects of place making in displacement in the Pacific Rim region It focuses focus on how people respond and readjust to changes and captures the long term community development outcomes and the critical moments that facilitate this development Interdisciplinary and using diverse research approaches the book includes contributions by authors from a variety of disciplines across disaster research sociology urban planning architecture anthropology earth science and education Mixed methods are adopted to carry out the research projects that ground this volume including qualitative research for social scientific research ethnographic methods and more importantly Participatory Action Research PAR is also included by authors who have a background in design professions and a few indigenous scholars who are themselves survivors of disasters The chapters are structured in the following five thematic sections Learning as place making in displacement Gender and place making in response to displacement Community resilience in keeping indigenous sense of place Community Re building in displacement Transnational Place making Talk to the Actor Understanding how affected communities are recovering from their own perspectives this book will be of interest to academics in the fields of area studies political science disaster planning and human geography NIST Special Publication, 1995 Civil Engineering, JSCE, 1997 **Japan's Beach Erosion: Reality And Future Measures (Second Edition)** Takaaki Uda, 2017-03-16 Beaches in Japan have been eroding since the 1970s because of artificial land alterations and unsustainable coastal development Almost all causes of the beach erosion in Japan are due to anthropogenic factors as a result of human activity This book presents the state of the beaches throughout Japan looking at the current reality and the classification of causes of beach erosion using real life illustrated examples It then goes on to look at practical models which can be used to predict changes to different types of beaches and concludes with investigation of beach erosion as a wider structural problem Lessons learnt show the manner in which excessive coastal development without clearly identified measures for beach protection can have widespread global ramifications This second edition presents new findings from field studies carried out on Japanese beaches along with the development and improvement of the numerical model presented previously In addition to the first edition six new examples of the beach erosion in Japan are included as is new analysis of the BG model a model for predicting based on Bagnold s concept which can be applicable to various field problems Originally published in Japanese 2004 this updated version gives clear practical guidance to coastal engineers working to prevent irreversible beach erosion and sustainable coastal development policy Coasts, Marine Structures and Breakwaters 2023 Kevin Burgess, 2024-03-19 The ICE Coasts Maritime Structures and Breakwaters conference series is the leading international forum for the presentation of the latest developments in coastal and maritime engineering This book is provided as 2 individual volumes **Corrosion Engineering**, 1995 Japan's Beach Erosion: Reality And Future Measures Takaaki

Uda,2010-06-23 Beaches in Japan have been eroding since the 1970s as a result of the artificial land alterations Approximately 3000 fishing ports and 1000 commercial ports have been built nationwide as well as 2532 large dams being constructed in the upstream basins of large rivers Due to the port and dam developments fluvial sand supply has significantly reduced resulting in shoreline recession around the river mouths Continuous sand supply along the coastline has also been obstructed by the port breakwaters The formation of wave shelter zone by the port breakwaters induce longshore sand transport thereby leading to an accretion of large amount of sand in the wave shelter zone and erosion in the surrounding area Thus almost all causes of the beach erosion in Japan are due to anthropogenic factors The exact situation of the beach erosion has never been clear in literatures that are written in Japanese or in English Coastal engineers can and should learn from these results otherwise the same situation and problems which were induced by excessive coastal development without protection measures and due attention given to nearby coasts will recur throughout the world Textbooks on coastal engineering that were already published describe only the theoretical fundamentals of the subject but lack the practical perspectives and field studies The book examines many coastal areas as examples highlighting the various erosion factors which should be avoided elsewhere globally This book was first published in Japanese in 2004 and was translated into English by the present author **History** Colin van Rensburg,2011 Concrete Library International ,2001 *Seawater in Concrete Mix* Hidenori Hamada,Nobuaki Otsuki,Takahiro Nishida,2021-09-30 In the near future many parts of the world will suffer from a shortage of freshwater Effective use of seawater in concrete production could therefore become a crucial technology Seawater in Concrete Mix provides a detailed overview of the fundamental knowledge of concrete engineering that is essential for the usage of seawater mixed concrete According to the worldwide standard for reinforced concrete RC freshwater is typically used in concrete mixing rather than seawater Yet a potential exists for the extensive use of seawater in concrete especially with the addition of ground granulated blast furnace slag fly ash or other mineral admixtures The recent trend toward performance based design makes this alternative more viable The text is ideal for graduate students researchers concrete engineers and all civil engineers who deal with concrete for infrastructure Hidenori Hamada is Professor of Kyushu University Japan Nobuaki Otsuki is Professor Emeritus of Tokyo Institute of Technology and was Chairman of the JCI Technical Committee on the use of seawater in concrete Takahiro Nishida is Senior Researcher of the Japanese National Institute of Maritime Port and Aviation Technology
