Programming Languages Norman Ramsey, 2022-10-27 Computer scientists often need to learn new programming languages quickly The best way to prepare for this is to understand the foundational principles that underlie even the most complicated industrial languages This text for an undergraduate programming languages course distills great languages and their design principles down to easy to learn bridge languages implemented by interpreters whose key parts are explained in the text The book goes deep into the roots of both functional and object oriented programming and it shows how types and modules including generics polymorphism contribute to effective programming The book is not just about programming languages it is also about programming Through concepts examples and more than 300 practice exercises that exploit the interpreter students learn not only what programming language features are but also how to do things with them Substantial implementation projects include Milner's type inference both copying and mark and sweep garbage collection and arithmetic on arbitrary precision integers **Pattern Recognition and Image Analysis** Joao Miguel Sanches, Luisa Micó, Jaime

Cardoso, 2013-05-23 This book constitutes the refereed proceedings of the 6th Iberian Conference on Pattern Recognition and Image Analysis IbPRIA 2013 held in Funchal Madeira Portugal in June 2013 The 105 papers 37 oral and 68 poster ones presented were carefully reviewed and selected from 181 submissions The papers are organized in topical sections on computer vision pattern recognition image and signal applications **The Politics of Bad Options** Stefanie Walter, Ari Ray, Nils Redeker, 2020-11-12 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read at Oxford Academic and offered as a free PDF download from OUP and selected open access locations Why was the Eurozone crisis so difficult to resolve Why was it resolved in a manner in which some countries bore a much larger share of the pain than other countries Why did no country leave the Eurozone rather than implement unprecedented austerity Who supported and opposed the different policy options in the crisis domestically and how did the distributive struggles among these groups shape crisis politics Building on macro level statistical data original survey data from interest groups and qualitative comparative case studies this book argues and shows that the answers to these questions revolve around distributive struggles about how the costs of the Eurozone crisis should be divided among countries

and within countries among different socioeconomic groups Together with divergent but strongly held ideas about the right way to conduct economic policy and asymmetries in the distribution of power among actors severe distributive concerns of important actors lie at the root of the difficulties of resolving the Eurozone crisis as well as the difficulties to substantially reform EMU The book provides new insights into the politics of the Eurozone crisis by emphasizing three perspectives that have received scant attention in existing research a comparative perspective on the Eurozone crisis by systematically comparing it to previous financial crises an analysis of the whole range of policy options including the ones not chosen and a unified framework that examines crisis politics not just in deficit debtor but also in surplus creditor countries
