Women, Love, and Commodity Culture in British Romanticism Daniela Garofalo,2016-02-17 Offering a new understanding of canonical Romanticism Daniela Garofalo suggests that representations of erotic love in the period have been largely misunderstood Commonly understood as a means for transcending political and economic realities love for several canonical Romantic writers offers instead a contestation of those realities Garofalo argues that Romantic writers show that the desire for transcendence through love mimics the desire for commodity consumption and depends on the same dynamic of delayed fulfillment that was advocated by thinkers such as Adam Smith As writers such as William Blake Lord Byron Sir Walter Scott John Keats and Emily Bront engaged with the period s concern with political economy and the nature of desire they challenged stereotypical representations of women either as self denying consumers or as intemperate participants in the market economy Instead their works show the importance of women for understanding modern economics with women s desire conceived as a force that not only undermines the political economy s emphasis on productivity growth and perpetual consumption but also holds forth the possibility of alternatives to a system of capitalist exchange Beijing Review ,1998 Resisting Abstraction Gordon Hughes,2014-11-25 The first English language study of the influential French painter Robert Delaunay to appear in thirty years Delaunay has long been appreciated as one of the leading Parisian artists of the early twentieth century And art historians have consistently viewed his vibrantly colored paintings starting in 1912 as early experiments in abstraction Hughes however tautly argues that Delaunay was not just one of the earliest artists to work in pure abstraction but the earliest one to do so The colorful optically driven canvases that Delaunay produced set him apart from the more ethereal abstraction of Kandinsky Mondrian Malevich and Kupka with whom he is often clubbed and whose spiritual motivations he rejected Delaunay s paintings were grounded in material sensation and reflected the modern optical science of his time They had nothing in common with the idealism that drove Kandinsky and the others As a result his work set the stage not only for the kind of abstraction that would come to dominate painting in the mid twentieth century Pollock Stella Still Kline it also inspired the critics who theorized and elevated that particular strain of modernist practice *The British Trade Journal* ,1903 **The Interlopers** Vera Keller,2023-04-18 A reframing of how scientific knowledge was produced in the early modern world Winner of the Phyllis Goodhart Gordan Book Prize by the Renaissance Society of America Shortlisted for the Pfizer Award by the History of Science Society Many accounts of the scientific revolution portray it as a time when scientists disciplined knowledge by first disciplining their own behavior According to these views scientists

such as Francis Bacon produced certain knowledge by pacifying their emotions and concentrating on method In *The Interlopers* Vera Keller rejects this emphasis on discipline and instead argues that what distinguished early modernity was a navigation away from restraint and toward the violent blending of knowledge from across society and around the globe Keller follows early seventeenth century English projectors as they traversed the world pursuing outrageous entrepreneurial schemes along the way These interlopers were developing a different culture of knowledge one that aimed to take advantage of the disorder created by the rise of science and technological advances They sought to deploy the first submarine in the Indian Ocean raise silkworms in Virginia and establish the English slave trade These projectors developed a culture of extreme risk taking uniting global capitalism with martial values of violent conquest They saw the world as a riskscape of empty spaces disposable people and unlimited resources By analyzing the disasters as well as a few successes of the interlopers she studies Keller offers a new interpretation of the nature of early modern knowledge itself While many influential accounts of the period characterize European modernity as a disciplining or civilizing process *The Interlopers* argues that early modernity instead entailed a great undisciplining that entangled capitalism colonialism and science
