A final comprehensive lab challenges readers to apply techniques and principles in developing various case studies. Each lab features the same easy to follow format: outlining the purpose of the lab, materials required, background information, procedures, discussion questions, and references. Detailed appendixes contain a summary of the effects of common pharmacological agents on cardiorespiratory responses at rest, common metric conversions used in exercise testing and prescription calculations, a list of metabolic and anthropometric formulas, and answers to lab questions. The appendixes also contain all forms and worksheets required for collecting data and completing the lab assignments.
