rewards of combining motherhood with an academic career in chemistry The authors are all women at different stages of their career and from a range of colleges in tenure and non tenure track positions Aimed at undergraduate and graduate students of chemistry these contributions serve as examples for women considering a career in academia but worry about how this can be balanced with other important aspects of life The authors describe how they overcame particular challenges but also highlight aspects of the systems which could be improved to accommodate women academics and particularly encourage more women to take on academic positions in the sciences
