

## 5.25 30.5 Lab: Linear Regression, Topics, and Practice Questions

### 5.25 30.5/30.5

The goal of this lab is to learn how to use R to fit a linear regression model, interpret the results, and evaluate the model. You will also learn how to use R to fit a logistic regression model, interpret the results, and evaluate the model. You will also learn how to use R to fit a generalized linear model, interpret the results, and evaluate the model.

You will learn the following concepts in this lab: (1) How to fit a linear regression model using R. (2) How to interpret the results of a linear regression model. (3) How to evaluate the performance of a linear regression model. (4) How to fit a logistic regression model using R. (5) How to interpret the results of a logistic regression model. (6) How to evaluate the performance of a logistic regression model. (7) How to fit a generalized linear model using R. (8) How to interpret the results of a generalized linear model. (9) How to evaluate the performance of a generalized linear model.

There are multiple ways to solve many of these problems, so we will give you a few different methods to try. We will also give you some hints and tips to help you solve the problems. We will also give you some practice questions to help you test your understanding of the concepts. We will also give you some practice questions to help you test your understanding of the concepts. We will also give you some practice questions to help you test your understanding of the concepts.

The practice questions are on the following pages:

The practice questions are on the following pages:

1. Linear regression using R
2. Logistic regression using R
3. Generalized linear models using R
4. Interpreting the results of a linear regression model
5. Interpreting the results of a logistic regression model
6. Interpreting the results of a generalized linear model
