Mixture Formation in Spark-Ignition Engines Hans Peter Lenz, Walter Böhme, 2013-11-11 Twentyfour years have gone by since the publication of K Lohner and H Muller's comprehensive work *Gemischbildung und Verbrennung im Ottomotor* in 1967 1 1 Naturally the field of mixture formation and combustion in the spark ignition engine has witnessed great technological advances and many new findings in the intervening years so that the time seemed ripe for presenting a summary of recent research and developments Therefore I gladly took up the suggestion of the editors of this series of books Professor Dr H List and Professor Dr A Pischinger to write a book summarizing the present state of the art A center of activity of the Institute of Internal Combustion Engines and Automotive Engineering at the Vienna Technical

University which I am heading is the field of mixture formation there fore many new results that have been achieved in this area in collaboration with the respective industry have been included in this volume The basic principles of combustion are discussed only to that extent which seemect necessary for an understanding of the effects of mixture formation The focal point of this volume is the mixture formation in spark ignition engines covering both the theory and actual design of the mixture formation units and appropriate intake manifolds Also the related measurement technology is explained in this work

Chastek,2003-08-02 Software product lines are emerging as an important new

paradigm for software development Product lines are enabling organizations to achieve impressive time to market gains and cost reductions In 1997 we at the Software Engineering Institute SEI launched a Product Line Practice Initiative Our vision was that product line development would be a low risk high return proposition for the entire software engineering community It was our hope from the beginning that there would eventually be sufficient interest to hold a conference The First Software Product Line Conference SPLC1 was the realization of that hope Since SPLC1 we have seen a growing interest in software product lines Companies are launching their own software product line initiatives product line technical and business practices are maturing product line tool vendors are emerging and books on product lines are being published Motivated by the enthusiastic response to SPLC1 and the increasing number of software product lines and product line researchers and practitioners the SEI is proud to sponsor this second conference dedicated to software product lines We were gratified by the submissions to SPLC2 from all parts of the globe from government and commercial organizations From these submissions we were able to assemble a rich and varied conference program with unique opportunities for software product line novices experts and those in between This collection represents the papers selected from that response and includes research and experience reports
