quality movements The good news is that solutions born of this philosophy are all around us from Brockton Massachusetts where the state s once failing largest high school now sends most graduates to college to Leander Texas a large district where school improvement spurred by the ideas of quality guru W Edwards Deming has become a way of life A welcome exception to the doom and gloom canon of education reform After the Education Wars makes clear that what s needed is not more grand ideas but practical and informed ways to grow the best ones that are already transforming schools

Louisiana Agriculture ,2016 **Misplaced Blame** Bonnie Johnson,2021-10-14 *Misplaced Blame* Decades of Failing Schools Their Children and Their Teachers examines the underlying causes of why schools fail The book describes the challenges that teachers and their pupils encounter in an environment that is dictated by poverty and harsh unfunded mandates The volume illustrates that school failure reflects a lack of opportunities nothing more The book also discusses the changing role of teachers over the years and teacher led efforts to improve their students circumstances Children of Katrina Alice Fothergill,Lori Peek,2015-09-01 When children experience upheaval and trauma adults often view them as either vulnerable and helpless or as resilient and able to easily bounce back But the reality is far more complex for the children and youth whose lives are suddenly upended by disaster How are children actually affected by catastrophic events and how do they cope with the damage and disruption *Children of Katrina* offers one of the only long term multiyear studies of young people following disaster Sociologists Alice Fothergill and Lori Peek spent seven years after Hurricane Katrina interviewing and observing several hundred children and their family members friends neighbors teachers and other caregivers In this book they focus intimately on seven children between the ages of three and eighteen selected because they exemplify the varied experiences of the larger group They find that children followed three different post disaster trajectories declining finding equilibrium and fluctuating as they tried to regain stability The children s moving stories illuminate how a devastating disaster affects individual health and well being family situations housing and neighborhood contexts schooling peer relationships and extracurricular activities This work also demonstrates how outcomes were often worse for children who were vulnerable and living in crisis before the storm Fothergill and Peek clarify what kinds of assistance children need during emergency response and recovery periods as well as the individual familial social and structural factors that aid or hinder children in getting that support Reforming New Orleans Peter F. Burns,Matthew O. Thomas,2015-12-18 Hurricane Katrina devastated New Orleans in 2005 but in the subsequent ten years the city has demonstrated both remarkable

resilience and frustrating stagnation In *Reforming New Orleans* Peter F Burns and Matthew O Thomas chart the city's recovery and assess how successfully officials at the local state and federal levels transformed the Big Easy in the wake of disaster Focusing on reforms in four key sectors of urban governance economic development education housing and law enforcement both before and after Katrina they find lessons for cities hit by sudden shocks such as natural disasters or large scale financial crises One of their key insights is that post disaster recovery tends to limit local control State and federal officials national foundations and local actors excluded by pre Katrina politics used their resources and authority to displace entrenched local interests and implement a public agenda focused on institutional and governmental change Burns and Thomas also make clear reform in New Orleans was already underway before Katrina hit but that it had focused largely on upper and middle class residents a trend that accelerated after the storm The market centered nature of the reforms have ensured that they largely benefited city and regional elites while not significantly aiding the city's working class and impoverished populations Thus reform has come at a cost and that cost in the long term could undermine the political gains of the post Katrina era

Only in New Orleans Luis Mirón, Brian R. Beabout, Joseph L. Boselovic, 2015-07-22 With 2015 marking the 10th commemoration of Hurricane Katrina education reform in New Orleans continues to garner substantial local national and international attention Advocates and critics alike have continued to cite test scores new school providers and different theories of governance in making multiple arguments for and against how contemporary education policy is shaping public education and its role in the rebuilding of the city Rather than trying to provide a single unified account of education reform in New Orleans the chapters in this volume provide multiple ways of approaching some of the most significant questions around school choice and educational equity that have arisen in the years since Katrina This collection of research articles essays and journalistic accounts of education reform in New Orleans collectively argues that the extreme makeover of the city's public schools toward a new market based model was shaped by many local historically specific conditions In consequence while the city's schools have been both heralded as a model for other cities and derided as a lesson in the limits of market based reform the experience of education reform that has taken place in the city and its impacts on the lives of students families and educators could have happened only in New Orleans

Fictions of Integration Naomi Lesley,2017-03-03 This book examines how children s and young adult literature addresses and interrogates the legacies of American school desegregation Such literature narrates not only the famous battles to implement desegregation in the South in places like Little Rock Arkansas but also more insidious and less visible legacies such as re segregation within schools through the mechanism of disability diagnosis Novelizations of children s experiences with school desegregation comment upon the politics of getting African American children access to white schools but more than this as school stories they also comment upon how structural racism operates in the classroom and mutates over the course of decades through the pedagogical practices depicted in literature for young readers Lesley combines approaches from critical race theory disability studies and educational philosophy in order to investigate how the educational market simultaneously constrains how racism in schools can be presented to young readers and also provides channels for radical critiques of pedagogy and visions of alternative systems The volume examines a range of titles from novels that directly engage the Brown v Board of Education decision such as Sharon Draper s *Fire From the Rock* and Dorothy Sterling s *Mary Jane* to novels that engage less obvious legacies of desegregation such as Cynthia Voigt s *Dacey s Song* Sharon Flake s *Pinned* Virginia Hamilton s *The Planet of Junior Brown* and Louis Sachar s *Holes* This book will be of interest to scholars of American studies children s literature and educational philosophy and history
