Melissa Rappaport Schiffman,2018-08-07 The green building movement has produced hundreds of how to books and websites that are filled with tips about green building and what homeowners should do to go green While helpful and informative when it comes to making actual purchasing and installation decisions these books do not make it any easier for a homeowner to prioritize against a budget Here Schiffman shares her knowledge and experience for others to use in their journey toward a greener way of living Whether the reader is building a new home or doing a minor remodel a homeowner needs a framework by which to guide their decisions These decisions are based on values and the author posits that there are really only three reasons to go green

- For Our Health By building more sustainably we reduce our exposure to harmful chemicals and toxins
- For Our Wealth By building a more durable home and being more efficient with resources like water and electricity we reduce our monthly utility bills and ongoing maintenance expenses
- For Our Soul Collectively doing the right thing for our planet does make a difference and that is soul nourishing
