Drawing the Map of Life Victor K. McElheny, 2010-10-19 Drawing the Map of Life is the dramatic story of the Human Genome Project from its origins through the race to order the 3 billion subunits of DNA to the surprises emerging as scientists seek to exploit the molecule of heredity It s the first account to deal in depth with the intellectual roots of the project the motivations that drove it and the hype that often masked genuine triumphs Distinguished science journalist Victor McElheny offers vivid insightful profiles of key people such as David Botstein Eric Lander Francis Collins James Watson Michael Hunkapiller and Craig Venter McElheny also shows that the Human Genome Project is a striking example of how new techniques such as restriction enzymes and sequencing methods often arrive first shaping the questions scientists then ask Drawing on years of original interviews and reporting in the inner circles of biological science Drawing the Map of Life is the definitive up to date story of today s greatest scientific quest No one who wishes to understand genome mapping and how it is transforming our lives can afford to miss this book

The Test Anya Kamenetz, 2015-01-06 The anti testing movement now has a guidebook Kamenetz shows how fundamentally American it would be to move toward a more holistic system New York Times Book Review The Test is an essential and critically acclaimed book for any parent confounded by our national obsession with standardized testing It recounts the shocking history and tempestuous politics of testing and borrows strategies from fields as diverse as games neuroscience and ancient philosophy to help children cope It presents the stories of families teachers and schools maneuvering within and beyond the existing educational system playing and winning the testing game And it points the way toward a hopeful future of better tests and happier kids
