Innovations in Services Marketing and Management: Strategies for Emerging Economies Goyal, Anita, 2013-10-31 Modern corporations face a variety of challenges and opportunities in the field of sustainable development Properly managing assets and maintaining effective relationships with customers are crucial considerations in successful businesses Innovations in Services Marketing and Management Strategies for Emerging Economies presents insights into marketing strategies and tactical perspectives in both large and small enterprises The chapters in this book explore case studies contemporary research and theoretical frameworks in effective business management providing students academicians researchers and managers with the resources and insight necessary to identify key trends in emerging economies and build the next generation of innovative services *Geotechnical Safety and Risk IV* Limin Zhang, Yu Wang, Gang Wang, Li Dianqing, 2013-11-15 Geotechnical Safety and Risk IV contains the contributions presented at the 4th International Symposium on Geotechnical Safety and Risk 4th ISGSR Hong Kong 4-6 December 2013 which was organised under the auspices of the Geotechnical Safety Network GEOSNet TC304 on Engineering Practice of Risk Assessment and Management and TC205 on Safety and Reliability of Geotechnical Structures in ISO2394 K.K. Phoon, J.V. Retief, 2016-11-25 The latest 4th edition of the international standard on the principles of reliability for load bearing structures ISO2394 2015 includes a new Annex D dedicated to the reliability of geotechnical structures The emphasis in Annex D is to identify and characterize critical elements of the geotechnical reliability based design process This book contains a wealth of data and information to assist geotechnical engineers with the implementation of semi probabilistic or full probabilistic design approaches within the context of established geotechnical knowledge principles and experience The introduction to the book presents an overview on how reliability can play a complementary role within prevailing norms in geotechnical practice to address situations where some measured data and or past experience exist for limited site specific data to be supplemented by both objective

regional data and subjective judgment derived from comparable sites elsewhere The principles of reliability as presented in ISO2394 2015 provides the common basis for harmonization of structural and geotechnical design The balance of the chapters describes the uncertainty representation of geotechnical design parameters the statistical characterization of multivariate geotechnical data and model factors semi probabilistic and direct probability based design methods in accordance to the outline of Annex D This book elaborates and reinforces the goal of Annex D to advance geotechnical reliability based design with geotechnical needs at the forefront while complying with the general principles of reliability given by ISO2394 2015 It serves as a supplementary reference to Annex D and it is a must read for designing geotechnical structures in compliance with ISO2394 2015 *Interpersonal Relationships E-Book* Elizabeth C. Databases for Data-Centric Geotechnics
Kok-Kwang Phoon, Chong Tang, 2024-12-20 Databases for Data Centric Geotechnics forms a definitive reference and guide to databases in geotechnical and rock engineering to enhance decision making in geotechnical practice using data driven methods This first volume pertains to site characterization The opening chapter presents an in depth analysis of site data attributes including the establishment of a new taxonomy of site data under 4S site generalizations spatial features sampling characteristics and smart data to provide a novel agenda for data driven site characterization Type 3 machine learning methods disruptive value are possible as sensors become more pervasive and more intelligent A comprehensive overview of site characterization information is also presented with a focus on its availability coverage value to decision making and challenges The remaining 13 chapters cover databases of soil and rock properties and the application of these databases to rock socket behavior rock classification settlement on soft marine clays permeability of fine grained soils and liquefaction among others The databases were compiled from studies undertaken in many countries including Austria Australia Brazil Canada China France Finland Germany India Iran Japan Korea Malaysia Mexico New Zealand Norway Singapore Sweden Thailand the United Kingdom and the United States This volume on site characterization is a companion to the volume on geotechnical structures Databases for Data Centric Geotechnics represents the most diverse and comprehensive assembly of database research in a single publication consisting of two volumes to date It follows from Model Uncertainties for Foundation Design also published by CRC Press and suits specialist geotechnical engineers researchers and graduate students

Landslides in Sensitive Clays Vikas Thakur, Jean-Sébastien L'Heureux, Ariane Locat, 2017-05-23 This book gathers the most recent scientific research on the geological geotechnical and geophysical aspects of slope failure in sensitive clays Gathering contributions by international experts it focuses on understanding the complete and practical spectrum of challenges presented by landslides in such complex materials Based on sound and validated research results the book also presents several recommendations that could be implemented in the guidelines or code of practice These recommendations cover topics including the characterization and behavior of sensitive clays the pre failure failure and post failure stages of sensitive clays mapping and identification methods climate change hazard assessment and risk management Sensitive clays are known for their potential for causing large landslides which pose a serious risk to human lives

infrastructure and surrounding ecosystems within their reach This has been demonstrated by the recent catastrophic landslides in e g S rum 2016 Skjeggstad 2015 Statland 2014 Byneset 2012 St Jude 2010 Lyngen 2010 and Kattmarka 2009 The 2015 collapse of the Skjeggstad Bridge in Norway which was due to a landslide in sensitive clay alone costs millions of dollars in repairs Recently efforts are being made to increase society s ability to cope with such landslide hazards Geoscientists are now expected to provide input to the agencies responsible for landslide risk preparedness In other words geoscientists role is not only to act as technologists to establish new theories but also to go the extra mile to implement them in practice so as to find meaningful solutions to geotechnical problems
