Copyright Office, 1967 Includes Part 1 Number 2 Books and Pamphlets Including Serials and Contributions to Periodicals July December British Books, 1920 *Civil War Field Artillery* Earl J. Hess, 2022-10-05 The American Civil War saw the creation of the largest most potent artillery force ever deployed in a conflict fought in the Western Hemisphere It was as sizable and powerful as any raised in prior European wars Moreover Union and Confederate artillery included the largest number of rifled pieces fielded in any conflagration in the world up to that point Earl J Hess s *Civil War Field Artillery* is the first comprehensive general history of the artillery arm that supported infantry and cavalry in the conflict Based on deep and expansive research it serves as an exhaustive examination with abundant new interpretations that reenvision the Civil War s military Hess explores the major factors that affected artillerists and their work including the hardware the organization of artillery power relationships between artillery officers and other commanders and the influence of environmental factors on battlefield effectiveness He also examines the lives of artillerymen the use of artillery horses manpower replacement practices effects of the widespread construction of field fortifications on artillery performance and the problems of resupplying batteries in the field In one of his numerous reevaluations Hess suggests that the early war practice of dispersing guns and assigning them to infantry brigades or divisions did not inhibit the massing of artillery power on the battlefield and that the concentration system employed during the latter half of the conflict failed to produce a greater concentration of guns In another break with previous scholarship he shows that the efficacy of fuzes to explode long range ordnance proved a

problem that neither side was able to resolve during the war Indeed cumulative data on the types of projectiles fired in battle show that commanders lessened their use of the new long range exploding ordnance due to bad fuzes and instead increased their use of solid shot the oldest artillery projectile in history **Popular Science** ,1947-11 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better
