Isai, Dr. Ujwala W Fule (Wasnik), Dr. Jyoti Arya, Dr. Bikram Saha, Ms. T. Tamilvani, Dr. Sajjinarjun, 2025-04-29 We are delighted to share New Volume of Book An International Textbook on Emerging and Advanced Trends of Biological Science and Bioinstrumentation Techniques this book explore the advance emerging fields of life science providing new innovative methodologies of research and practical approach Interdisciplinary concerns in this book highlight the most current advancements in the field of life sciences and sets as benchmark to study applied branches of life science to provide students and budding researchers to take up and comprehends advance technology like Artificial Intelligence and in vitro techniques to upscale their skills The book serves as milestone acting as a valuable resource for comprehending many concepts applications and techniques in life sciences for research and development in order to accomplish long term progress Advances in the life sciences go beyond molecular fundamentals and reaches to all boundaries from land to ocean with applied use of pearl to silkworm which help to boost economy of nation In recent years developing nations have been preparing to compete internationally in the biological

sciences The exponential expansion in the quantity of scientific information and the rate at which discoveries are created necessitates highly detailed interdisciplinary and up to date knowledge and understanding The book tried to give a great quantity of material from the vast and ever expanding field of Life Sciences and Forensic Sciences in an easily retrievable format Entire Book is divide into Four Section to understand of varied topics in the form of book chapter unveils the secretes of pharmaceutical drugs herbal formulation pathobiology and their therapeutic interventions environmental sustainability waste management and resource recovery systemic signalling in plants applied microbiology and biotechnology are all developing areas in biological study Section A deals with applied branches of Zoology which help young generation to scale up their skill in varied applied branches such as Sericulture Mariculture Aquaculture is the production of aquatic organisms including fish mollusks crustaceans and aquatic plants and the cultivation of freshwater and marine plants and animals under controlled conditions Sericulture is an agro based domestic industry with high employment potential and higher income generation potential Moreover it is a budget friendly occupation for small and marginal farmers offering better returns Section B deals with Agriculture Agroforestry and its application Its universal fact Agricultural plays a pivotal role in the growth and survival of nation therefore maintaining its quantity and quality is essential for feeding the population and economic exports Similarly Organic farming has appeared as a prime concern area globally in aspect of the growing demand for safe and healthy food durable sustainability and issue on environmental pollution associated with random use of agrochemicals Agroforestry is a term for practices where trees are combined with farming as well as for the interdisciplinary subject area embracing land use systems Thus this section is valuable for society as term clearly derives from uniting two subject areas forestry and agriculture which for a long time but not necessarily for good reasons were institutionally separated the world over in terms of education research policy development and its implementation As such agroforestry has been at the forefront of much recent innovation in both farming and forestry The principal forces driving this innovation have been the introduction of a more human perspective from the agricultural tradition into forestry while emphasizing a more ecological as opposed to agronomic perspective in agriculture including the longer time horizons and larger spatial scales that forestry has always embraced Section C deals applied aspects of Botany as Plant Sciences with advances in Agriculture in terms of Genetic Crops GM crops Bt Cotton Bt Brinjal Bt Corn The essential elements of GM crops are briefly discussed in this chapter with emphasis on their history advantages problems and potential future effects Genetic engineering produces GM crops by transferring certain genes from one organism into another in order to confer desired features These characteristics could include better nutritional value herbicide tolerance insect resistance and increased yield potential In this Modern World worlds of GM crops and maintained their place in a just and sustainable global food system continued research appropriate regulation and informed public conversation are crucial Cyanobacteria are of increasing interest for research and industry Most of them are growing in fresh water or salt water but some of them live in extreme environments

This tendency of the cyanobacteria indicates a high degree of biological adaptations which enables these organisms to compete effectively in natural conditions Similarly Investigation of traditional medicine is very important for the welfare of rural and tribal communities for the treatment of conventional illness This may add to the expensive and inadequate health care facilities in rural areas there are a lot to be done in this promising field with the active support of village people so that importance of these homeopathic important plant could be rejuvenated for the benefit of our future generations and need to improve health care condition Section D deals with Most Prominent and Advances in Artificial Learning assisted discovery and innovative techniques in the field of life science including study of Drug delivery systems DDSs which boost pharmaceutical world enhance the solubility stability and bio distribution of free drugs Loading pharmaceuticals on DDSs can create drug reservoirs for controlled and sustained release keeping drug levels within therapeutic range Horticulture and allied aspect of grooming vegetation with a variety of techniques and types of plant life cultivated for some of uses Methods tools and plant life grown depend upon the tradition and climate There are some of traditional horticulture practices that we recognize of today together with Indigenous peoples the use of biochar to beautify soil productivity by using smoldering plant waste Cheminformatics or chemical informatics is an in silico study design where drug molecules are visualized in 3D This approach aids in identifying target molecules which may be genes or proteins Bioinformatics on the other hand involves the comparative analysis of genes DNA RNA proteins and molecules Mathematical and software tools facilitated by computers are crucial in handling large and complex biological datasets This analytical approach helps interpret biological data leading to the identification of molecules understanding disease conditions and assessing the extent of cure or relief from a disease Section E deals with advances in Pharmaceutical industries in Marine environment and Marine biosphere is the largest one of the earth and harbors an enormous number of different organisms Recent technology advancements further added to the domain of drug research in isolation and evaluation of marine derived products To date significant number of compounds have been isolated Wide range of antibacterial anti inflammatory ant parasitic neuroprotective antiviral anticancer analgesic antimicrobial antimalarial compounds have been pursued in control and management of diseases The production of specific secondary metabolites is an important adaption mechanism of marine organisms to survive in the sea These metabolites possess biological activities which make them interesting as possible drugs for human The development of these drugs has afforded valuable knowledge and crucial insights to meet the most common challenges in this endeavor such as toxicity and supply This book is a conclave of ignited minds and true researcher s souls who passionately dedicated their time and dedication towards research Its spark of sciences that collectively helps all scientific community from eminent scientists academicians and researchers will surely be a part of almost information for the coming new research taken by the researchers in the field of chemical sciences and other disciplines in the future
