Entropy Vector, The: Connecting Science And Business Robert D Handscombe, Eann A Patterson, 2004-04-16 How do managers and entrepreneurs evaluate risk encourage creativity or manage change Might a better grasp of science help The authors of this book suggest that there is real value in trying to connect science to business and that science is far too important just to be left to the scientists All of science is too large a prospect so the authors limit themselves to looking at disorder We must all learn to manage and control change and there is plenty of social technical and business change going on The authors suggest that a clearer understanding of entropy and the choices it presents will assist in that management of change or as they put it to manage disorder one needs to control the entropy vector This book is for scientists and engineers aspiring to business success and for business people interested in new approaches **The Entropy Vector** Robert D. Handscombe, Eann A. Patterson, 2004 How do managers and entrepreneurs evaluate risk encourage creativity or manage change Might a better grasp of science help The authors of this book suggest that there is real value in trying to connect science to business and that science is far too important just to be left to the scientists Handbook of Qualitative Research Techniques and Analysis in Entrepreneurship Helle Neergaard, Claire M. Leitch, 2015-10-30 One of the most challenging tasks in the research design process is choosing the most appropriate data collection and analysis technique This Handbook provides a detailed introduction to five qualitative data collection and analysis techniques pertinent to exploring entrepreneurial phenomena Techniques for collecting and analysing data are rarely addressed in detail in published articles In addition the constant development of new tools and refinement of existing ones has meant that researchers often face a confusing range from which to choose The experienced and expert group of contributors to this book provide detailed practical accounts of how to conduct research employing focus groups critical incident technique repertory grids metaphors the constant comparative method and grounded theory This Handbook will become the starting point for any research project Scholars new to entrepreneurship and doctoral students as well as established academics keen to extend their research scope will find this book an invaluable and timely resource **A School Built on Ethos** James Handscombe, 2021-03-30 In A School Built on Ethos Ideas assemblies and hard won wisdom James Handscombe explores how schooling is more than gaining qualifications how learning is more than exams and how academic success comes more readily to those who have grasped this idea Harris Westminster Sixth Form has had enormous success in providing an academic education for students of all socio economic backgrounds This success is grounded in the development of a scholarly ethos that guides students and staff into successful habits driven by a clear vision for the community and communicated through everything that the school says and does In this book founding principal James Handscombe takes readers through the school's development and illustrates its journey by sharing a selection of the assemblies that have underpinned and elucidated its ethos In doing so he offers guidance on how such a staple of school life can be used to shape

a community and shares transferable lessons on how assemblies can be planned and delivered effectively Furthermore James discusses the challenges the school faced during its creation and offers an improved understanding of how academic and scholarly learning can be delivered and developed in a school whether it be newly formed or already established He also asks the fundamental question of how schools can encourage and enable disadvantaged young people to aspire to and engage in academic enquiry Suitable for both established and aspiring school leaders especially those who are thinking about the kind of school they would like to run and how they can shape it *Management, Valuation, and Risk for Human Capital and Human Assets* M. Computational Science and Its Applications - ICCSA 2006 Marina L. Gavrilova,2006 Learning with Fractional Orthogonal Kernel Classifiers in Support Vector Machines Jamal Amani Rad,Kourosh Parand,Snehashish Chakraverty,2023-03-18 This book contains select chapters on support vector algorithms from different perspectives including mathematical background properties of various kernel functions and several applications The main focus of this book is on orthogonal kernel functions and the properties of the classical kernel functions Chebyshev Legendre Gegenbauer and Jacobi are reviewed in some chapters Moreover the fractional form of these kernel functions is introduced in the same chapters and for ease of use for these kernel functions a tutorial on a Python package named ORSVM is presented The book also exhibits a variety of applications for support vector algorithms and in addition to the classification these algorithms along with the introduced kernel functions are utilized for solving ordinary partial integro and fractional differential equations On the other hand nowadays the real time and big data applications of support vector algorithms are growing Consequently the Compute Unified Device Architecture CUDA parallelizing the procedure of support vector algorithms based on orthogonal kernel functions is presented The book sheds light on how to use support vector algorithms based on orthogonal kernel functions in different situations and gives a

significant perspective to all machine learning and scientific machine learning researchers all around the world to utilize fractional orthogonal kernel functions in their pattern recognition or scientific computing problems

Information Measures Christoph Arndt, 2012-12-06 This book is intended to be an introduction to the mathematical description of information in science The necessary mathematical theory of this introduction will be treated in a more vivid way than in the usual theorem proof structure This however enables us to develop an idea of the connections between different information measures and to understand the trains of thought in their derivation which is a crucial point for correct applications It is therefore our intention in the mathematical descriptions to evolve the important ideas of the derivations so that we obtain the resulting functions as well as the main thoughts and the conditions for the validity of the result This simplifies the handling of the information measures which are sometimes hard to classify without any additional background information Though the mathematical descriptions are the exact formulations of the measures examined we do not restrict ourselves to rigorous mathematical considerations but we will also integrate the different measures into the structure and context of possible information measures Nevertheless the mathematical approach is unavoidable when we are looking for an objective description and for possible applications in optimization
