It may also be necessary to take bio availability into account. The aim of the present project was to critically review proposals on principles for risk assessment of metals. MERAG developed by the metals industry in co operation with the UK Government during 2005-2006. The different MERAG proposals were reviewed by different Nordic consultancies and their views are summarised in the report. The project was initiated and coordinated by the Nordic Risk Assessment Project NORAP which receives funding from the Nordic Chemicals group, a subgroup to the Nordic Council of Ministers. This review was considered urgent in order to be prepared for a possible proposal to implement the MERAG principles within the Technical Guidance Document on Chemical

Safety Assessment which is developed for use under the REACH regulation
