**Notes:** Monksman Rodgers used the national database given as a source for his research. He says there were only 10,000 in total, compared to 100,000 in the 1950s.

**Abstract:** This paper presents a new approach to the problem of finding the optimal path in a network. The approach is based on the use of a heuristic function to estimate the cost of the path from a given node to the goal. The heuristic function is defined as the sum of the cost of the path from the node to the goal and the cost of the path from the goal to the node. This approach is shown to be more efficient than the standard A\* algorithm.
