Handbook of Energy and Environmental Security Muhammad Asif, 2022-05-10 Handbook of Energy and Environmental Security educates the reader about the wider dimensions of the distinctive yet intertwined subjects of energy security and environmental security. The book uniquely addresses these two increasingly important topics in a comprehensive and composite manner describing the concepts and wider dimensions of energy and environmental security in technological, economic, social and geopolitical perspectives. Divided into three main parts, the book deals with the subject of energy security in terms of its concepts, broader dimensions and allied issues; focuses on environmental security and covers subjects in a cohesive manner discussing their important interfaces and commonalities. Providing valuable scholarship for academics, researchers and analysts in the fields of energy and the environment and using case studies to illustrate national and international levels, this is a valuable resource for energy and environmental security challenges, especially in the areas of sustainable development and climate change. Discusses the critical subjects of energy security and environmental security in a composite manner. Incorporates up to date data, case studies and comparative assessments. Energy and environmental policy frameworks are covered from the perspective of both developed and developing countries.

Environmental Security in Africa Elisha Jasper Dung, Leonard Sitji Bombom, Augustine Avwunudiogba, 2024-08-19. Environmental Security in Africa: Conflicts, Politics and Development investigates the nature, scope and dimension of environmental security in Africa from a multidisciplinary perspective to examine the history, theories, spatial patterns, sociocultural, socioeconomic consequences and legal ramifications of Africa's environmental concerns. This book is grounded in theories that cut across the social, behavioral and environmental sciences, arguing that environmental security is a multifaceted subject intricately linked to global climate change and magnified by globalization. Drawing from case studies across different parts of Africa, Elisha Jasper Dung, Leonard Sitji Bombom, Augustine Avwunudiogba and the contributors argue that the integral part of the solution to Africa's environmental security issues are entrenched in victims' local, regional, social, cultural, political and economic circumstances in specific geographical locations such as Nigeria, Northeast Africa, Kenya and South Sudan.
