Achievement Levels and Achievement Level Descriptors

With the implementation of the Georgia Milestones Assessment System, Georgia educators have developed four achievement levels to describe student mastery and command of the knowledge and skills outlined in Georgia's content standards. Most students have at least some knowledge of the content described in the content standards; however, achievement levels succinctly describe how much mastery a student has. Achievement levels give meaning and context to scale scores by describing the knowledge and skills students must demonstrate to achieve each level.

The four achievement levels on Georgia Milestones are *Beginning Learner*, *Developing Learner*, *Proficient Learner*, and *Distinguished Learner*. The general meaning of each of the four levels is provided below:

Beginning Learners do not yet demonstrate proficiency in the knowledge and skills necessary at this grade level/course of learning, as specified in Georgia's content standards. The students need substantial academic support to be prepared for the next grade level or course and to be on track for college and career readiness.

Developing Learners demonstrate partial proficiency in the knowledge and skills necessary at this grade level/course of learning, as specified in Georgia's content standards. The students need additional academic support to ensure success in the next grade level or course and to be on track for college and career readiness.

Proficient Learners demonstrate proficiency in the knowledge and skills necessary at this grade level/course of learning, as specified in Georgia's content standards. The students are prepared for the next grade level or course and are on track for college and career readiness.

Distinguished Learners demonstrate advanced proficiency in the knowledge and skills necessary at this grade level/course of learning, as specified in Georgia's content standards. The students are well prepared for the next grade level or course and are well prepared for college and career readiness.

More detailed and content-specific concepts and skills are provided for each grade, content area, and course in the **Achievement Level Descriptors (ALDs)**. ALDs are narrative descriptions of the knowledge and skills expected at each of the four achievement levels and were developed for each grade level, content area, and course by committees of Georgia educators in March 2015 and July 2015. The ALDs are based on the state-adopted content standards.

Advance Praise for *Leadership Learning Teaching and Practice* This is a book about experience This is a book that draws from the knowledge both personal and professional that professors and practitioners shared on their journeys through academia and the day to day of K 12 administration The book is framed around the trinity of teaching learning and practice It is a book that examines the tensions gaps and intersections between the practices of leadership within educational systems and school leadership preparation programs The reader will be challenged to consider one's own approach to leadership in education by examining each author's perspective on leading for learning in America's schools Professor James E Berry Executive Director National Council of Professors of Educational Administration This book provides a great balance of scholarly work focused on leadership and shaped by the actual experiences of practicing administrators It is absolutely outstanding literature for leaders The book provides concepts and experiences that will help veteran administrators and will serve as a great resource for instructors in leadership development programs It strikes at the heart of teaching and learning and will ultimately have a positive influence on children Lyle E Evans Ed D Assistant Superintendent for Human Resources and Administrative Services Chesterfield County Public Schools Commonwealth of Virginia The challenges faced by school leaders today are daunting In *Leadership Learning Teaching and Practice* experts from across the nation bridge the gap between theory and practice This book explores those tensions calling us to examine our ideal view of school leadership and compare it to the reality of the current school systems in which we work It furthers this discourse by examining the role leadership preparation programs play in preparing school administrators with the knowledge and skills necessary to be effective while retaining their humanity An easy read that will transform how leaders think about leadership Jessica Kemler Principal Babylon Elementary School Long Island New York

Fish Pheromones and Related Cues P. W. Sorensen, Brian D. Wisenden, 2015-03-16 Pheromones are chemical cues that pass between members of the same species that convey specific adaptive information These cues and related chemicals whose function are less well defined are especially important to fishes because of their aquatic environments and complex behaviors Pheromones are also of increasing interest in both basic and applied aspects of fish biology because they can be used to manipulate fish behavior and may explain phenomena such as fishery collapse *Fish Pheromones and Related Cues* provides a timely synthesis of this growing body of research in freshwater and marine species and explores everything from how these chemical signals evolved are produced released and then processed and finally to potential applications in fish culture and conservation *Fish Pheromones and Related Cues* opens with a useful overview on the theory of chemical communication and definitions Chapters then progress by examining the biological importance of pheromones in inter and intra species communication the role these chemical cues play in a variety of biological functions from reproduction to predation and then how they evolved and are detected and recognized by fish nervous systems Final chapters provide valuable insight into how pheromones can be measured how pheromonal disruption can explain effects of environmental pollution and lastly how they pheromones are being applied in real world efforts to

culture fish species and to conserve our wild populations and control invasive species With far reaching economic evolutionary and ecological implications Fish Pheromones and Related Cues will be an essential volume for anyone working in the fields of chemical communication fish biology fisheries science aquatic conservation ecology invasive species control and aquaculture

Encyclopedia of Fish Physiology, 2011-06-01 Fish form an extremely diverse group of vertebrates At a conservative estimate at least 40% of the world's vertebrates are fish On the one hand they are united by their adaptations to an aquatic environment and on the other they show a variety of adaptations to differing environmental conditions often to extremes of temperature salinity oxygen level and water chemistry They exhibit an array of behavioural and reproductive systems Interesting in their own right this suite of adaptive physiologies provides many model systems for both comparative vertebrate and human physiologists This four volume encyclopedia covers the diversity of fish physiology in over 300 articles and provides entry level information for students and summary overviews for researchers alike Broadly organised into four themes articles cover Functional Thematic and Phylogenetic Physiology and Fish Genomics Functional articles address the traditional aspects of fish physiology that are common to all areas of vertebrate physiology including Reproduction Respiration Neural Sensory Central Effector Endocrinology Renal Cardiovascular Acid base Balance Osmoregulation Ionoregulation Digestion Metabolism Locomotion and so on Thematic Physiology articles are carefully selected and fewer in number They provide a level of integration that goes beyond the coverage in the Functional Physiology topics and include discussions of Toxicology Air breathing Migrations Temperature Endothermy etc Phylogenetic Physiology articles bring together information that bridges the physiology of certain groupings of fishes where the knowledge base has a sufficient depth and breadth and include articles on Ancient Fishes Tunas Sharks etc Genomics articles describe the underlying genetic component of fish physiology and high light their suitability and use as model organisms for the study of disease stress and physiological adaptations and reactions to external conditions Winner of a 2011 PROSE Award Honorable Mention for Multivolume Science Reference from the Association of American Publishers The definitive encyclopedia for the field of fish physiology Three volumes which comprehensively cover the entire field in over 300 entries written by experts Detailed coverage of basic functional physiology of fishes physiological themes in fish biology and comparative physiology amongst taxonomic Groups Describes the genomic bases of fish physiology and biology and the use of fish as model organisms in human physiological research Includes a glossary of terms
